

MANAGING MANAGEMENT EDUCATION-II

The second edition of Career360's MME -II evolved into a round table that brought together a small but influential group of academics to discuss and debate the various challenges in the domain...

That the regulatory regime for management education in the country is under tremendous stress is an understatement. With contradictory judgements that provide one year reprieve, the institutions seek a stable regulatory regime that provides a nurturing environment

for good players while coming down heavily on poor quality institutions. The discussion was vibrant and productive. The outcome was to present a common agenda to the Ministry of HRD in the coming days and ensure that policy making is reverted to its rightful place in parliament. ■
