Syllabus for Ph.D Entrance Examination - Mathematics

**Matrix Algebra:** Rank of a Matrix, Linear dependence. Solutions of Linear Systems: Existence and Uniqueness. Diagonalization of a Matrix, Power of a Matrix, Diagonalization by Orthogonal Transformation, Quadratic Forms.

**Vector Analysis:** Divergence and curl of a vector point function. Physical interpretation of divergence and curl of a vector point function. Integration of vector functions – Line, surface and volume integrals. Guass, Green and Stoke’s theorems.

**Differential Equations:** General solution of homogeneous equations, non-homogeneous equations, Wronskian, method of variation of parameters.

**Modern Algebra:** Definition of Groups, Subgroups and Factor Groups, Lagrange's Theorem, Homomorphisms, Normal Subgroups and Permutation Groups.

**Complex Analysis:** Analytic functions, CR-equations. Cauchy’s theorem, integral formula, poles and singularities.

**Real Analysis:** Limit of Functions. Continuous Functions, Continuity and Compactness, Continuity and Connectedness, Derivative of a Real Function. Mean Value Theorem.

**Statistics and Probability Theory:** Probability, conditional probability, independent events, total probability and Baye’s theorem. Random Variable, Probability density function, distribution function, mathematical expectation, variance, Discrete Distributions – Binomial, Poisson, Continuous Distribution – Normal distribution.
