This institution is managed by MATAAMRITANANDAMAYI MATH a spiritual and religious organization. All students have to maintain discipline and decorum of the founding organization.

Health Sciences students are required to place high value on personal appearance, including attire. The reasons are rooted in concerns for infection control, communication and cultural sensitivity. This document sets forth standards for dress and appearance necessary to meet the service and

safety objectives of placing patient welfare first and the educational objectives of preparing the student to assume the role of a professional health care worker. Patient trust and confidence in the health care provider are essential for successful treatment experiences and net results. The message communicated by the caregiver by his/her dress and appearance plays a fundamental role in establishing this trust and confidence. Students should consider the cultural sensitivities of their most conservative potential patients and present themselves in a manner that will earn their respect, ensure their trust and make them feel comfortable. Recent trends in clothing, body art and body piercing may not be generally accepted by the patients and should not be worn by students.

Observance of strict discipline is therefore absolutely essential. A pamphlet containing, detailed rules to be strictly observed by the student will be given in person. Special attention is drawn to the following points:
