

N96 nano mask launched

Scientists from the Centre for Nanosciences and Molecular Medicine at Amrita Vishwa Vidyapeetham recently launched a three-ply N96 Nano Mask based on cutting-edge nanotechnology. The cost-effective mask (less than ₹ 200) can be reused up to 30 times. The mask, with nano-layered filter, has been lab-tested to provide 99.9% aerosol filtration as well as 96% particle filtration of more than three microns.
