PROGRAM
BSc Cardiovascular Technology
(Revised with effect from 2014-2015 onwards)

A Super Speciality Tertiary Care Hospital Accredited by ISO 9001-2008, NABL & NABH
SPIRITUAL PRINCIPLES IN EDUCATION

“In the gurukulas of ancient rishis, when the master spoke it was love that spoke; and at the receiving end disciple absorbed of nothing but love. Because of their love for their Master, the disciples’ hearts were like a fertile field, ready to receive the knowledge imparted by the Master. Love given and love received. Love made them open to each other. True giving and receiving take place where love is present. Real listening and ‘sraddha’ is possible only where there is love, otherwise the listener will be closed. If you are closed you will be easily dominated by anger and resentment, and nothing can enter into you”.

“Satguru Mata Amritanandamayi Devi”
Amrita Institute of Medical Sciences

Since its inception, Amrita Institute of Medical Sciences (AIMS) in fifteen short years has grown from a 115 bed specialty hospital to a 1250 bed super-speciality tertiary care health centre with an attached medical school and hospital. On the 17th of May 1998, AIMS was inaugurated by the Prime Minister of India, Shri Atal Bihari Vajpayee, in the presence of Her Holiness, Sri Mata Amritanandamayi Devi. The Amrita Institute of Medical Sciences is the adjunct to the term “new universalism” coined by the World Health Organization. This massive healthcare infrastructure with over 9,00,000 sq. ft of built-up area spread over 100 acres of land supports a daily patient volume of approx 3000 outpatients and an average of 135 admissions. Annual patient turnover touches an incredible figure of over 9,00,000 outpatients and nearly 41,000 inpatients.

With extensive facilities comprising 28 modern operating theatres, 220 equipped intensive-care beds, a fully computerized and networked Hospital Information System (HIS), a fully digital radiology department, a 24/7 telemedicine service and a comprehensive well-equipped clinical laboratory, AIMS offers a total and comprehensive health solution comparable to the best hospitals in the world. AIMS features one of the most advanced hospital computer networks in India. The network supports more than hundreds computers and has computerized nearly every aspect of patient care including all patient information, lab testing and radiological imaging. The AIMS team comprises physicians, surgeons and other healthcare professionals of the highest calibre and experience. Our Hospital services are accredited by ISO 9001-2008 and National Accreditation Board for Hospitals & Healthcare Providers (NABH) and lab services by National Accreditation Board for Testing and Calibration Laboratories.

The educational institutions of Amrita Institute of Medical Sciences, which include the Amrita School of Medicine, the Amrita School of Dentistry, the Amrita College of Nursing, the Amrita School of Pharmacy and Amrita Centre for Allied Health Sciences are committed to being centres of excellence providing value-based medical education, where the highest human qualities of compassion, dedication, purity and service are instilled in the youth. Amrita Institute of Medical Sciences strives to help all students attain the competence and character to humbly serve humanity in accordance with the highest principles and standards of the healthcare profession.

Based on evaluation of all our University campuses and programs by a peer review committee, the university has been accredited by the National Assessment and Accreditation Council (NAAC) with an ‘A’ grade. Amrita has also been ranked in the Ivy League of Indian Universities along with Indian Institute of Science, Bangalore, Tata Institute of Fundamental Research (TIFR), Mumbai etc. in a review of deemed universities by the Ministry of Human Resource Development (MHRD) of the Government of India. In a recent review of Deemed Universities by a high-power committee of reputed academicians, popularly known as the Tandon Committee, set up by the Ministry of Human Resources Development, Amrita Vishwa Vidyapeetham was placed in Category 1. In Tamil Nadu, besides Amrita, only the Chennai Mathematical Institute, a Deemed University, was given this recognition.

I.2. Medium of Instruction:
English shall be the medium of instruction for all subjects of study and for examinations.

I.3. Eligibility:
Generally Science Graduates with Physics, Chemistry, and Biology are eligible for admission to the Under Graduate Courses except in respect of certain specialties for which other qualification or subjects are specifically called for. Essential qualifications for eligibility are mentioned under clause I.1

II. General Rules:
Admissions to the courses will be governed by the conditions laid down by the University from time to time and as published in the Regulations for admissions each year.

II.1. Duration of the Course
Duration details are mentioned under clause No.I of this booklet.

Duration of the course : 4 Years (3 years + 1 year Internship except for courses at serial number 1 and 2 in clause I.1)
Weeks available per year : 52 weeks
Vacation / holidays : 5 weeks (2 weeks vacation + 3 weeks calendar holidays)
Examination (including preparatory) : 6 weeks
Extra curricular activities : 2 weeks
Weeks available : 39 weeks
Hours per week : 40 hours
Hours available per academic year : 1560 (39 weeks x 40 hours)

Internship wherever specified are integral part of the course and needs to be done in Amrita Institute of Medical Sciences, Kochi itself.

II.2. Discontinuation of studies
Rules for discontinuation of studies during the course period will be those decided by the Chairman /Admissions, Amrita School of Medicine, and Published in the “Rules and Regulations” every year.

II.3. Educational Methodology
Learning occurs by attending didactic lectures, as part of regular work, from co-workers and senior faculty, through training offered in the workplace, through
 reading or other forms of self-study, using materials available through work, using materials obtained through a professional association or union, using materials obtained on students own initiative, during working hours at no cost to the student.

### II.4. Academic Calendar

Course will follow and annual scheme as per details mentioned under:

**FIRST YEAR**

III. Examination Regulations:

III.1. Attendance:

80% of attendance (physical presence) is mandatory. Medical leave or other types of sanctioned leaves will not be counted as physical presence. For those who possess a minimum of 75% attendance, deficiency up to 5% may be condoned on medical or other genuine grounds by the Principal at his sole discretion and as per the recommendation of the Heads of Departments concerned. Students are allowed such condonation only once for entire course of study. Condonation fee as decided by the Principal has to be paid. Attendance will be counted from the date of commencement of the session to the last day of the final examination in each subject.

III.2. Internal Assessment:

1. Regular periodic assessment shall be conducted throughout the course. At least two sessional examinations in theory and preferably two practical examinations should be conducted in each subject. The model examination should be of the same pattern of the University Examination. Average of the two examinations and the marks obtained in assignments / oral / viva / practicals also shall be taken to calculate the internal assessment.

2. A candidate should secure a minimum of 35% marks in the internal assessment in each subject (separately in theory and practical) to be eligible to appear for the University examination.

3. The internal assessment will be done by the department thrice during the course period in a gap of not more than three months and model exam will be the same pattern of university examination. The period for sessional examinations of academic year are as follows:

   - First Sessional Exam : November
   - Second Sessional Exam : February
   - Model Exam : May /June

4. Each student should maintain a logbook and record the procedures they do and the work patterns they are undergoing. It shall be based on periodical assessment, evaluation of student assignment, preparation for seminar, clinical case presentation, assessment of candidate’s performance in the sessional examinations, routine clinical works, logbook and record keeping etc.
5. Day to day assessment will be given importance during internal assessment, Weightage for Internal assessment shall be 20% of the total marks in each subject.

6. Sessional examination as mentioned above will be conducted and secured by the students along with their attendance details shall be forwarded to the Principal (Result of the first sessional examination should reach before December 1st week of the academic year and result of the second sessional examination should reach to the Principal before March 1st week of the academic year)

7. Third sessional examinations (model exam) shall be held three to four weeks prior to the University Examination and the report shall be made available to the Principal ten days prior to the commencement of the university examination.

III.3. University Examinations:

- University Examination shall be conducted at the end of every academic year. A candidate who satisfies the requirement of attendance and internal assessment marks, as stipulated by the University shall be eligible to appear for the University Examination.
- One academic year will be twelve months including the days of the University Examination. Year will be counted from the date of commencement of classes which will include the inauguration day.
- The minimum pass marks for internal assessment is 35% and for the University Examination is 45%. However the student should score a total of 50% (adding the internal and external examination) to pass in each subject (separately for theory and practical)
- If a candidate fails in either theory or practical paper, he/she has to reappear for both the papers (theory and practical)
- Maximum number of attempts permitted for each paper is five (5) including the first attempt.
- The maximum period to complete the course shall not exceed 6 years.
- All practical examinations will be conducted in the respective clinical areas.
- Number of candidates for practical examination should be maximum 12 to 15 per day
- One internal and external examiner will jointly conduct the theory evaluation and practical examination for each student during the final year.
III.4. Eligibility to appear university Examination:

A student who has secured 35% marks for Internal Assessment is qualified to appear for University Examination provided he/she satisfies percentage of attendance requirement as already mentioned at the III (1).

III.5. Valuation of Theory – Revaluation Papers:

1. Valuation work will be undertaken by the examiners in the premises of the Examination Control Division in the Health Sciences Campus.
2. There will be Re-Valuation for all the University examinations. Fees for revaluation will be decided by the Principal from time to time.
3. Application for revaluation should be submitted within 5 days from date of result of examination declared and it should be submitted to the office with payment of fees as decided by the Principal.

III.6. Supplementary Examinations:

Every main University examination will be followed by a supplementary examination which will normally be held within four to six months from the date of completion of the main examination.

As stipulated under clause No. III.2 under Internal Assessment, HOD will hold an internal examination three to four weeks prior to the date of the University Examination. Marks secured in the said examination or the ones secured in the internal examination held prior to the earlier University Examination whichever is more only will be taken for the purpose of internal assessment. HODs will send such details to the Principal ten days prior to the date of commencement of University examination.

Same attendance and internal marks of the main examination will be considered for the supplementary examination, unless the HOD furnish fresh internal marks and attendance after conducting fresh examination.

Students who have not passed / cleared all or any subjects in the first University examination will be permitted to attend the second year classes and also eligible to appear for second year university examination along with first year supplementary examination. However, he / she can appear for the third (final) year university examination, only if he / she clears all the subjects in the first as well as in the second year examinations.

Students of supplementary batches are expected to prepare themselves for the University Examinations. No extra coaching is expected to be provided by the Institution. In case at any time the Institution has to provide extra coaching, students will be required to pay fees as fixed by the Principal for the said coaching.
III.7. Rules regarding carryover subjects:

A candidate will be permitted to continue the second and third year respectively of the course even if he/she has failed in the first or second year university examinations.

A candidate must have passed in all subjects to become eligible to undergo compulsory internship of one year. For the candidates who have not passed all the subjects the duration of the third year shall be extended until they become eligible to undergo compulsory internship.

IV. Criteria for Pass in University Examination - Regulations:

IV.1. Eligibility criteria for pass in University Examination:

In each of the subjects, a candidate must obtain 50% in aggregate for a pass and the details are as follows:

- A separate minimum of 35% for Internal Assessment.
- 45% in Theory & 35% in Oral / Viva.
- A separate minimum of 50% in aggregate for Practicals / Clinics (University Examinations).
- Overall 50% is the minimum pass in subject aggregate (University Theory + Viva / Oral + Practicals + Internal Assessment).

IV.2. Evaluation and Grade:

1. Minimum mark for pass shall be 50% in each of the theory and practical papers separately (including internal assessment) in all subjects except English. Only a minimum of 40% is required to pass in English.
2. A candidate who passes the examination in all subjects with an aggregate of 50% marks and above but less than 65% shall be declared to have passed the examination in the second class.
3. A candidate who passes the examination in all subjects in the first attempt obtaining not less than 65% of the aggregate marks for all the three years shall be declared to have passed the examination with First Class.
4. A candidate who secures an aggregate of 75% or above marks is awarded distinction. A candidate who secures not less than 75% marks in any subject will be deemed to have passed the subject with distinction in that subject provided he / she passes the whole examination in the first attempt.
5. A candidate who takes more than one attempt in any subject and pass subsequently shall be ranked only in pass class.
6. A Candidate passing the entire course is placed in Second class / First class / Distinction based on the cumulative percentage of the aggregate marks of all the subjects in the I, II and III (Final) university examinations.
7. Rank in the examination : - Aggregate marks of all three year regular examinations will be considered for awarding rank for the B.Sc Graduate Ex-
amination. For the courses where the number of students are more than 15 only, rank will be calculated as under:

- Topmost score will be declared as First Rank.
- Second to the topmost will be declared as Second Rank.
- Third to the topmost will be declared as Third Rank.
- There will be no ranking if the candidate is less than 15.

V. Internship:

V.1. Eligibility for Internship - Regulations:

Wherever internship is a part of the curriculum, students will have to do the internship in Amrita Institute of Medical Sciences itself. A candidate must have passed in all subjects to become eligible to undergo compulsory internship of one year or a period fixed in the curriculum.

“Internship has to be done continuously for a period provided in the syllabus except in extra ordinary circumstances where subject to the approval of the Principal the same may be done in not more than two parts with an interruption not exceeding six months. In any case Internship shall be completed within 18 months from the date of acquiring eligibility to do the internship.

V.2. Attendance and Leave details during Internship:

For 30 days of duty an intern will be eligible for casual leave and one weekly off. For all Under Graduate courses, the period of internship will be one year and so an intern is eligible for one casual leave and one weekly off in a month and total 12 days casual leave is permitted during internship for a student. For example if a student has taken more than 15 days leave in an emergency situation, then he/she is permitted 12 days as casual leave and the remaining 3 days she/he has to compensate by doing duty for 3 days after expiry of the original date.

A Student will become eligible to receive his/her degree only after completion of internship to the complete satisfaction of the Principal.

VI. General considerations and teaching / learning approach:

There must be enough opportunities to be provided for self learning. The methods and techniques that would ensure this must become a part of teaching-learning process.

Proper records of the work should be maintained which will form the basis for the students assessment and should be available to any agency who is required to do statutory inspection of the school of the course.
Part II
Syllabus
INTRODUCTION AND ADVANCEMENT

Current management of various cardiac disorders includes complex diagnostic and therapeutic procedures, which involve use of various equipments, hardwares, tools, machines, and pharmacological agents. Handling of these equipments and tools as well as their regular maintenance requires advanced and focused knowledge of the scientific principles on which the tests and equipments function, as well as to have hands-on skill in using these equipments correctly and safely. The personnel who carryout these responsibilities also must have adequate knowledge of structure and function of the human body, especially the cardiovascular system. Optimal delivery of cardiovascular health care is based on the safe use of the equipments and devices. This necessitates development of a cadre consisting of science graduates, who obtain focused, relevant knowledge in this specific area of cardiovascular technology through didactic theoretic learning as well as supervised practical hands on training.

The B.Sc in Cardiovascular Technology consists of three years of clinical faculty supervised didactic theoretic learning and practical hands-on training. This enables the student to apply specialized occupational theory, skills and concepts. At the end of three years the candidates will have to pass the University examination to be eligible for the bachelor degree. Upon completion of the 3-year course and one year internship the candidates will evolve in to a full trained, qualified cardiovascular technologist capable of working independently.

Potential for the out going students:

1. Cardiac catheterization laboratory personnel
2. Research organizations
3. Biomedical industry
4. Technical specialists in healthcare institutions

MAIN OBJECTIVES OF THE COURSE

The objective of this training program is to have a paramedical service of personnel with core knowledge in clinical cardiovascular medicine and technology to support

1. Clinical cardiovascular procedures
2. Stress testing
3. Electrocardiography - performance and analysis
5. HUTT performance and reporting
6. Echocardiography
7. Cardiac catheterization (diagnostic, therapeutics), EP/RFA, device therapy (patient preparation, sedation, procedure assistants, follow up care and rehabilitation)
8. Heart failure therapeutic support
9. Rhythm management support
10. Pacemaker analysis, programming and follow up
11. To carry out basic maintenance of equipments and hardwares.
Program Outcomes (PO)
PO1: Fundamental knowledge on the subject.
PO2: Effective communication skills.
PO3: Knowledge in professional ethics
PO4: Leadership qualities and team work.
PO5: Problem Analysis and solving skills.
PO6: Basic knowledge on research methodology.
PO7: Higher Technical skills and competences.
PO8: Higher study options in many fields.
PO9: Employability in various sectors.
PO10: Better employment opportunities.

Program Specific Outcomes (PSO)
PSO1: Core knowledge in Clinical cardiovascular procedures
PSO2: Expertise in Stress testing, Electrocardiography - performance and analysis, Holter recording and reporting, HUTT performance and reporting and Echocardiography.
PSO3: Technical expertise in Cardiac catheterization
PSO4: Technical support in Heart failure therapy and Rhythm management.
PSO5: Pacemaker analysis, programming and follow up.
PSO6: To carry out basic maintenance of equipments and hardwares.

BCVT40
Value Based Education (Elective Course)
CO1: The attitude to be a good human being, with the curiosity to continue lifelong learning.
CO2: The conviction to do service to humanity - to put the interests of the individual patient as the foremost priority. Acquisition of values of gender sensitivity, environment & sustainablity.
CO3: Acquisition of the “skills for life” in addition to the skills to live.
CO4: Acquisition of positive lifelong values including ethics and etiquette.
CO5: The “practical applications” of the right values

This course is spread throughout the program. The students will be evaluated through 360 degree assessment.

COURSE STRUCTURE
First year
Theory classes and practicals of following subjects
- Anatomy
- Physiology
- Biochemistry
- Pharmacology
- Microbiology
- Pathology
- Introduction to Computer application
- Quality Assurance & Accreditation
- English
Second year  
Theory class and posting in the clinical area  
Cardiac Anatomy & Cardiac Physiology  
Cardiovascular Technology – Clinical

Third year  
Theory class and posting in the clinical area  
Cardiac Pathology & Pharmacology  
Cardiovascular Technology – Applied  
Cardiovascular Technology - Advanced

Fourth Year:

Fourth year is internship in the clinical area

FIRST YEAR

During the first year the students will have didactic lecture in the medical college from 10 am to 4 pm

Internal Assessment

Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks.

********************************************************************************

Paper I – AHS11  
Section A: ANATOMY

COURSE OBJECTIVE:
An outline of anatomy with special emphasis on applied aspects is provided to the students for better understanding of the technical and diagnostic procedure.

Course Outcome:

◦ Knowledge of general anatomy and locomotion.
◦ Knowledge of basic human anatomy and histology of CVS and Respiratory systems.
◦ Knowledge of basic human anatomy and histology of CNS, GI, excretory and reproductive systems.
◦ Knowledge of basic human anatomy and histology of endocrine system and special senses.

1. The human body as a whole  
   Definition  
   Sub divisions of anatomy  
   Terms of location and positions  
   1 hour
Fundamental planes, Vertebrate structure of man
Organization of body cells and tissues

2. **Locomotion and Support**  
8 hours
The Skeletal System
Types of bones
Structure and growth of bones
Divisions of the skeleton
Appendicular skeleton, Axial skeleton
Name of all the bones and their parts
Joints: Classification, Types of movements with examples
**Muscles:** Structure, classification, muscles of abdominal wall, muscles of Respiration, pelvic diaphragm, muscles of head and neck

**Practicals:**  
2 hours
Demonstrations of all bones:
Showing parts
Joints, X-rays of all normal bones and joints
Muscles: Classification of muscle

3. **Anatomy of nervous system**  
6 hours
Introduction and divisions of nervous system
Central nervous system: Spinal cord, Anatomy, and functions, Reflex arc

**The Brain:**
Location, gross features, parts, functional areas
Hindbrain, Midbrain, fore brain
Coverings of brain and peripheral nervous system
anatomy of cerebral blood supply & coverings
Spinal cord – gross features, extent, blood supply and coverings
Injuries to spinal cord and brain
Peripheral nervous system – organization & structure of a typical spinal nerve

**Practicals:**  
1 hour
Demonstration of brain and spinal cord

4. **Anatomy of Cardiovascular system**

**Gross anatomy & Structural features of the Heart and Great vessels:**  
**Heart**  
2 hours
Location, size, surface features, pericardium & valves
Right Atrium :: structural features
Venous area, Septum and atrial appendage
Right Ventricle :: structural features, inflow & Out flow characteristics
Left Atrium :: structural features, venous area, Septum and appendage
Left ventricle :: structural features, inflow & out flow characteristics
Valves :: valve apparatus, location
Structure & functions of each valve
Blood Supply of heart :: coronary arteries, cardiac cycle
Innervations :: sympathetic and parasympathetic sensory
Pulmonary circuit-names of the arteries and veins & positions
Lymphatic drainage of the Heart

**Great Vessels**
Structure of blood vessels and its organization
Aorta
Pulmonary artery & pulmonary vein
General plan of systemic circulation
Pulmonary circulation

**PRACTICALS**
Demonstration to illustrate normal angiograms.
Demonstration of surface features & interior of the heart
Demonstration of aorta and its branches
Histology of cardiac muscles and artery

**5. Anatomy of the Respiratory system**
Organs of Respiratory System:
Conducting portion, respiratory portion.
(Nose – nasal cavity, paranasal air sinuses
Larynx, trachea, bronchial tree)
Muscles of Respiration
Cross structure and the interior features of nose & nasal cavity
Para nasal air sinuses
Cross structure and interior features of the pharynx and larynx
Cross structures and interior features of the trachea and bronchial tree
Gross structure, histology, position and coverings of the lungs
Pulmonary circulation – pulmonary arteries pulmonary veins & bronchial arteries
Nerve supply to the respiratory system

**Practicals**
Demonstration of the parts and function
Demonstration of the different parts of the respiratory system with special emphasis
On lungs
Histology of lungs

**6. Anatomy of the digestive system**
Components of the digestive system
Alimentary tube
Mouth, tongue, tooth
Salivary gland, liver, biliary apparatus and its secretion, pancreas and pancreatic secretion, movements of intestine defecation, GI hormones malabsorption and

**Practicals**
Demonstrations of the parts and functions
Normal x-rays

**7. Anatomy of excretory system & Reproductive system**
Organization of the renal system
Kidneys: location, gross features, structure, blood supply and nerve supply
Excretory ducts, ureters, urinary bladder, urethra location gross features and structure

Male reproductive system: 2 hours
Testis, Duct system, Prostate
Female Reproductive system:
Ovaries, duct system, accessory organs

Practicals 1 hour
Demonstration of Kidneys, ureter, bladder
Histology of kidney

8. Anatomy of endocrine system 1 hour
Name of all endocrine glands and their positions
Hormones and their functions

9. Histology 6 hours

General Slides:
Hyaline cartilage, Fibro cartilage, Elastic cartilage, T.S & L.S of bone, Blood vessels, Tonsils, Spleen, Thymus, Lymph node, Epithelial tissue, Skeletal and cardiac muscle, Peripheral nerve and optic nerve

Systemic Slides 5 hours
5. G.I.T
6. Lung-Trachea
7. Kidney, Ureter, Urinary bladder
8. Endocrine- Adrenal, pancreas, pituitary, thyroid and parathyroid
9. Uterus, Ovary, testis

Reference books:
Human Anatomy- Regional and Applied Volume
B.D Chaurasia
Clinical Anatomy For Medical Students
Richard S.Snell

******************************************************************************

Paper I – Section B: PHYSIOLOGY

Course outcome:
1. CO1: Knowledge of general physiology, nerve-muscle physiology and haematology.
2. CO2: Knowledge of basic human physiology with respect to CVS, Respiratory system and GI system.
3. CO3: Knowledge of basic human physiology of excretion and CNS.
4. CO4: Knowledge of basic human physiology of special senses and endocrine system.

1. INTRODUCTION TO PHYSIOLOGY AND GENERAL PHYSIOLOGY- 1 hr
2. MUSCLE and NERVE - 3 hrs
• Neurons and glial cells - Structure, function, Types, electrical property, degeneration and regeneration.
• Muscle - Structure & Functions of skeletal muscle & smooth muscle
• Neuromuscular transmission – Functional anatomy, Transmission & Clinical importance.

3. HAEMATOLOGY - 9 hrs
• Fluid compartments, Composition & functions of blood, Plasma protein – names, functions.
• Erythrocyte - Morphology, Count, Function, Erythropoiesis, Factors affecting erythropoiesis, Structure of Haemoglobin, Erythrocyte Sedimentation rate, Anaemia, Polycythemia, Fate of RBC, Jaundice.
• Leucocytes - Morphology, Types, Properties & Functions, variations in count.
• Thrombocytes- Morphology, Count, Function, Variations.
• Hemostasis. Coagulation and its disorders.
• Blood groups and its importance, Blood transfusion.
• Tissue fluid and Lymph
• Immunity.

4. CARDIOVASCULAR SYSTEM - 10 hrs
• Organisation of CVS, Properties of Cardiac Muscle, Origin and spread of cardiac impulse
• Cardiac Cycle – Electrical (ECG)and mechanical events,
• Cardiac output, Measurement, (Fick’s Principle) regulation
• Blood pressure, measurement & variation, determinants, regulation, Shock.
• Regional circulation.(Salient features only)-coronary, Pulmonary, Cerebral, Cutaneous

5. RESPIRATORY SYSTEM - 8 hrs
• Introduction. Functional anatomy, Mechanics of ventilation, Pressure changes, volume changes, Surfactant, Compliance, Airway resistance.
• Alveolar ventilation, Dead space, Ventilation perfusion ratio and its significance,
• Spirogram
• Diffusion of gases, O₂ transport, CO₂ transport.
• Regulation of respiration – Voluntary, Neural, Chemical.
• Abnormalities of respiration Hypoxia, Cyanosis, Dyspnea, Asphyxia, High altitude,
• Dysbarism.

6. DIGESTIVE SYSTEM - 7 hrs
• Functional anatomy of GI tract,
• Secretions - Salivary secretion & its regulation, Gastric secretion and its regulation,
• Peptic ulcer, Pancreatic secretion and its regulation, Functions of liver. Bile – storage and functions. Intestinal juice
• Movements - Mastication, Deglutition, Movements of stomach, Small intestine, Large intestine. vomiting, Defecation.
• GI Hormones,
• Digestion & Absorption of carbohydrates, Proteins, Fat & vitamins

7. Excretion - 7 hrs
• Functional anatomy of kidney, Structure and function of kidney and nephron
• Renal blood flow, Glomerular filtration rate, Definition, Measurement and factors
• affecting Tubular functions – Reabsorption, Secretion, Acidification, concentration and abnormalities.
• Micturition – Bladder innervation, Micturition reflex.
• Functions of skin

8. ENDOCRINOLOGY - 6 hrs
a) Introduction to endocrinology (Different glands, hormones)
b) Pituitary gland (Anterial and posterior glands, actions and applied aspects.
c) Thyroid gland (Actions and applied aspects)
d) Calcium homeostasis (Parathyroid, Vitamin D, Calcitonin, actions and applied aspects)
e) Pancreas (Endocrine part – insulin, glucagon – actions and applied aspects)
f) Adrenal cortex and medulla (Actions and applied aspects)

9. REPRODUCTIVE SYSTEM - 3 hrs
• Male Reproductive System- Different parts, spermatogenesis, hormones
• Female reproductive system – Different parts, Sexual cycles – Menstrual cycles – Ovarian, endometrium
• Lactation, Pregnancy & Contraception (Basics only)

10. CENTRAL NERVOUS SYSTEM (Basics only) - 10 hrs
a) Organization of Nervous system.
b) Synapse, Properties & Function
c) Reflexes, Reflex action, Property, Function.
d) Sensory system – Receptor, Ascending sensory pathway (basics only), Thalamus, sensory cortex
e) Motor System – Spinal control of Motor activity, Motor areas in Cerebral Cortex,
f) Pyramidal & extra pyramidal tracts (basics only),
g) Basal ganglia & Cerebellum.
h) Hypothalamus
i) Autonomous nervous system
j) Cerebro spinal fluid- formation and functions.

11. SPECIAL SENSES (Basics only) - 4 hrs
• Audition
• Vision

Revision and evaluation session – 4-5 hours

Reference books:
Essentials of Medical Physiology
Anil Baran Singha Mahapatra

*******************************************************************************

Paper II – AHS12
Section A: BIOCHEMISTRY

Course outcome:
1. CO1: Knowledge of biochemistry of cell structure, functions, digestion, enzymes and proteins.
2. CO2: Knowledge of biochemistry of carbohydrates, minerals and vitamins.
3. CO3: Knowledge of biochemistry of liver and renal function tests, specialized laboratory investigations and lipids.
4. CO4: Knowledge of biochemistry of metabolism, homeostasis, nucleic acids and cancer.

I. CELL STRUCTURE & FUNCTIONS 1hr
3. Mitochondria
4. Endoplasmic reticulum, Lysosomes
5. Fluid mosaic model for membrane structure

II. DIGESTION AND ABSORPTION OF NUTRIENTS 2hrs
8. Digestion of carbohydrates
9. Fats
10. Enzymes in digestion of proteins

III. ENZYMES 1hr
3. Normal serum range and diagnostic importance of serum AST, ALP, ALT, CK, GGT and AMYLASE.

IV. PROTEINS 1hr
4. Essential amino acids
5. Plasma proteins
6. Immunoglobulins

V. CARBOHYDRATES 2hrs
1. Diabetes mellitus- symptoms and complications
2. Glucose tolerance test
3. Action of insulin and glucagon on carbohydrate metabolism

VI VITAMINS 2hrs
• Deficiency manifestations of Vitamin A, C, D, E, K
• Vit B Complex

VII MINERALS 1hr
• Factors maintaining serum calcium level and important functions of calcium
• Importance of trace elements

VIII HEMOGLOBIN 1hr
• Hemoglobin metabolism

IX LIVER FUNCTION TESTS 1hr
• Jaundice and types of jaundice
• Enzymes in liver disease

X RENAL FUNCTION TESTS 1hr
• Serum Creatinine

XI SPECIALIZED LABORATORY INVESTIGATIONS 1hr
Principle and applications of
• Radioimmunoassay (RIA)
• ELISA
• Colorimetry

XII LIPIDS 1hr
• Essential fatty acids (EFA)
• Poly unsaturated fatty acids (PUFA)
• Phospholipids

**XIII METABOLISM**
• TCA cycle (steps only)

**XIV MAINTENANCE OF HOMEOSTASIS**
• Plasma buffers
• Renal mechanisms in pH regulation
• Anion gap
• Metabolic acidosis,

**XV NUCLEIC ACIDS**
• DNA and RNA
• Purine and pyrimidine bases,

**XVI CANCER**
• Chemical and physical carcinogens
• Tumor markers.

**Reference books:**

- *Text Book of Biochemistry*
  T.N.Pattabhiraman
- *Essentials of Biochemistry*
  U.Sathyanarayanan

---------------------------------------------------------------------------------

**Paper II – Section B: PHARMACOLOGY**

**Course outcome:**
1. CO1: Basic knowledge in pharmacology.
2. CO2: Detailed systemic pharmacology.
3. CO3: Detailed knowledge of drugs and groups of drugs.

**Course**
- General Pharmacology – 4 hours
- Evaluation of drugs in man, drug prescribing and drug interactions – 3 hours
- Sedatives, hypnotics and pharmacotherapy of insomnia – 1 hour
- Drugs effective in convulsive disorders – 1 hour
- Opioid analgesics – 1 hour
- Analgesic – antipyretics and non-steroidal anti-inflammatory drugs – 1 hour
- Psychopharmacology – 1 hour
- Drug therapy of parkinsonism and other degenerative disorders of the brain – 1 hour
- Local anesthetics – 1 hour
- Adrenergic and adrenergic blocking drugs – 1 hour
- Histamine and anti histamic drugs – 1 hour
- Pharmacotherapy of cough – 1 hour
- Pharmacotherapy of bronchial asthma and rhinitis – 1 hour
- Digitalis and pharmacotherapy of cardiac failure – 1 hour
- Vasodilator drugs and pharmacotherapy of angina pectoris – 1 hour
- Pharmacotherapy of hypertension – 1 hour
- Drugs and blood coagulation – 1 hour
- Drugs effective in iron deficiency and other related anemias – 1 hour
- Diuretics – 1 hour
- Emetics, drug therapy of vomiting, vertigo and diarrhea – 1 hour
- Pharmacotherapy of constipation – 1 hour
- Pharmacotherapy of peptic ulcer – 1 hour
- Sulfonamides, Trimethoprim, cortimoxazole, nitrofurans and quinolones – 1 hour
- Penicillins and antibiotics effective mainly against gram positive organisms – 1 hour
- Amonoglycosides and other antibiotics effective mainly against gram negative organisms – 1 hour
- Antibiotics effective against both gram positive and gram negative organisms – 1 hour
- General principles of chemotherapy of infections – 1 hour
- Chemotherapy of urinary tract infections – 1 hour
- Antiseptics, disinfectants and insecticides – 1 hour
- Thyroid and antithyroid drugs – 1 hour
- Insulin and ant diabetic drugs – 1 hour
- Adrenal cortical steroids – 1 hour
- Vitamins and antioxidantants – 1 hour
- Drugs, pregnancy and the newborn – 1 hour

**Essentials of Medical Pharmacology**
Tripathi

**Basics and Clinical Pharmacology**
Katzung

********************************************************************

Paper III – AHS 13

Section A: MICROBIOLOGY

Course Outcome:
1. CO1: To understand the morphological characters of bacteria.
2. CO2: To master the preparation of smear, fixation and staining of bacterial smears and its quality control methods
3. CO3: Learn to use microscope, autoclave, hot air oven, water bath, steamer, filters
4. CO4: To differentiate between innate and adaptive immunity, and explain the main defences lines as well as biological barrier to the infections.
5. CO5: Employ antigen – antibody interaction to conduct different immunological and serological tests in the laboratory

Introduction to medical microbiology - 1 hr
Morphology and physiology of bacteria - 1 hr
Sterilization and disinfection - 2 hrs
Normal Microbial flora of the human body - 1 hr
Infection - 2 hrs
Antibiotics - 1 hr
Hospital infections and prevention - 2 hrs
Immunity - 1 hr
Antigen, Antibody, Antigen-antibody reactions - 1 hr
Immune response - 1 hr
Hypersensitivity - 1 hr
Immunoprophylaxis - 1 hr
Tuberculosis - 1 hr
Typhoid - 1 hr
Virus infections - 1 hr
HIV/AIDS - 1 hr
Hepatitis viruses - 1 hr
Medical Mycology - 1 hr
Medical Parasitology - 1 hr
Malaria - 1 hr
Urinary Tract Infections - 1 hr
Respiratory Tract Infections - 1 hr
Gastrointestinal Infections - 1 hr
Sexually Transmitted Disease - 1 hr
Infections of the nervous system - 1 hr

**Practical Demonstrations**

- Gram Staining - ½ hr
- Acid Fast Staining - ½ hr
- Antibiotic Susceptibility Testing - ½ hr
- CSSD Visit - ½ hr
- Theory Class Hours - 28 hrs
- Total hours - 30 hrs

Reference books:

- **Text Book of Medical Paracytology**  
  C.K. Jayaram Panicker

- **Text Book of Microbiology**  
  Anand Narayan

---

**Paper III - Section B: PATHOLOGY**

**Course Outcome:**

1. **CO1:** Knowledge of general and systemic pathology.
2. **CO2:** Knowledge of pathology of neoplasms.
3. **CO3:** Knowledge of basics of community health.

**1. Introduction to Pathology**

- Histopathology- Methods and techniques
- Cytology-FNAC, Exfoliative advantages and limitations of cytology
- Hematology-Sample collection.
- Immunohistochemistry, Immunofluorescence, Electron microscopy, Flow cytometry

2. **Cell injury & adaptations** 1 hr
   - Etiology
   - Reversible & Irreversible cell injury
   - Necrosis & Apoptosis
   - Gangrene - Dry - Wet
   - Atrophy, Hypertrophy, Hyperplasia, Metaplasia, Dysplasia.
   
   Fatty change

3. **Inflammation & Repair** 2 hrs
   - What is inflammation
   - Signs of inflammation, Acute and chronic inflammation, Types of inflammation, Giant cells, Macrophages, Ulcer, abscess, Acute inflammation, Systemic effects of acute inflammation
   - Factors affecting healing- Complications of healing

4. **Hemodynamic Disorders** 2 hrs
   - Definition of edema and causes of edema
   - Exudate and transudate
   
   Shock – Definition and types of shock

   Thrombosis
   
   Embolism- Definition and types of emboli ,- Pulmonary thromboembolism

5. **Neoplasia** 2 hrs
   - Definition
   - Difference between benign and malignant cells, Nomenclature of tumors
   - Routes of metastasis of tumours,- Staging of tumour,- Etiology of cancers -
   
   Diagnosis of cancer, including tumour markers

6. **CVS** 1hr
   - Definition of Ischaemia, Infarction, Aneurysm
   - Rheumatic heart disease, Infective endocarditis, Atherosclerosis
   - Myocardial infarction,Hypertension and pericardial effusion

7. **Respiratory system** 1hr
- Tuberculosis, Pleural effusion, Pneumonia, COPD and tumours

8. GIT 1hr
- Peptic ulcer, - Carcinoma of oesophagus, Stomach & Colon,
- Inflammatory bowel disease (UC & Crohns)

9. Liver and GB 1h
- Hepatitis. Cirrhosis, Tumours of liver
  ◦ Cholecystitis and GB calculi

10. Renal 1hr
- Glomerulonephritis & Pyelonephritis
- Renal calculi -Nephrotic syndrome, Renal tumors, Polycystic renal diseases-

Internal assessment 
Exam -1 ½ hrs

11. MGS 1hr
- Cryptorchidism,Orchitis, epididymitis, Prostatic hyperplasia
  • Carcinoma penis, Testicular tumors

12. FGS & Breast 1hr
Ovarian tumours,- Fibroid- Carcinoma cervix- Carcinoma endometrium pap
smear Fibroadenoma breast, Carcinoma Breast-Predisposing factors
& TNM

13. CNS 1hr
- Meningitis & encephalitis.- Alzheimer’s disease,
  Tumours - Meningioma, Gliomas, Metastasis
  CSF collection, indication and contraindication, tests performed, cytocentrifu

14. Skin & soft tissue 1hr
Skin- SCC, Melanoma,BCC inflammatory lesions lipoma,

15. Bone 1hr
Osteoporosis, Osteomyelitis,Rickets ,Osteomalacia
  Tumours – Osteosarcoma, Osteoclastoma , Ewings sarcoma & Arthritis
16. Endocrine
Organs, Pituitary, Adrenal brief; Thyroid – Goitre thyroiditis and tumours
Diabetes and its complications

17. Anaemias
- Types of anaemia

18. WBC disorders
Non neoplastic and neoplastic

19. Lymphoreticular system
- Lymphadenitis, Lymphomas

20. Platelet and coagulation abnormalities
- Primary & Secondary Hemostasis

21. Clinical Pathology I
Blood collection, anticoagulants used, vacuette and their color code. Complete hemogram and the various parameters, Bone marrow – Indication of BM study & collection procedure, PT, APTT sample collection

1hr

22. Clinical Pathology II
- Urine analysis –Physical, Chemical, microscopic, Dipstick parameters

1hr

23 Transfusion Medicine
- Blood grouping, cross matching, Screening of donor, Precautions to take when you start blood transfusion, Monitoring during transfusion, Transfusion reactions, Blood components.

1Hr

Internal assessment
Exam - 1 ½ hrs

Lab visit:
- Histopathology lab - 1 hr
- Hematology lab & blood bank - 1 hr
- Cytology lab - 1 hr

Total Hours: 29 hrs lecture + 3 hrs exam + 3 hrs lab visit = 35 hrs

Reference Books:

Basic Pathology: An introduction to the mechanisms of disease
Sunil R Lakhani, Susan A Dilly, Caroline J Filayson
Course outcome:
1. CO1: basic understanding of use of computer.
2. CO2: Applications of computer in clinical departments.
3. CO3: Detailed knowledge on how to use hospital information system.

Course Description: This course is designed for students to develop basic understanding of use of computer and its applications in Clinical Departments.

B.Sc Cardiovascular Technology
**Paper IV – Section B: QUALITY ASSURANCE AND ACCREDITATION**

**Course outcome:**
1. CO4: Introduction and basic concept of quality.
2. CO5: Standardization and Implementation

**Course Objectives:**
Modernization and its brand conscious make an organization thrive towards perfection in the comparative world of business. The underlying factor that allows an organization to stand the test of time is quality. The students are given the working knowledge of the subject.

**Course Content:**
- Introduction to quality - 2 hrs
- Definition, Concept, Benefits - 2 hrs
- Function - 2 hrs
- Design - 2 hrs
- Formulation - 2 hrs
- Standardization - 2 hrs
- Implementation - 2 hrs
- Factors affecting quality - 2 hrs
- Need for quality - 2 hrs
- Quality cycle - 2 hrs
- Quality objectives - 2 hrs
- Quality policy - 2 hrs
- Quality measurable - 2 hrs
- Quality Control, Quality Standards, Q C Tools - 6 hrs
- Quality Documents, QC Records, Kazen techniques - 2 hrs

Such as Market-in, TOC, Q C Circles, - 2 hrs
Suggestion scheme, TPM, Kanban, - 2 hrs
JIT, Zero defect programme - 2 hrs
ISO - 4 hrs
Quality management system Quality manual - 4 hrs
Quality procedures - 4 hrs
Quality records - 4 hrs
Quality audit - 4 hrs
Correlative and preventive action - 2 hrs
SQC (Statistical Quality Control techniques) - 2 hrs
Cost effectiveness - 2 hrs
Cost of quality system - 2 hrs
Benefit in total cost - 4 hrs
Cost measuring system - 4 hrs
TQM- Concept, awareness, aspects train - 4 hrs
Total - 80hrs

Detailed Course Plan

Unit- I
Introduction to quality –Definition, concept, Benefits-Functions-Design- Formulation- Standardization

Unit-II
Implementation –Factors affecting quality –Need for Quality Cycle –Quality objectives- Quality policy

Unit-III

Unit-IV
ISO- Quality management system- Quality manual-Quality procedure- Quality records- Quality audit

Unit- V
Corrective and preventive action –SQC (Statistical Quality Control technique)
Cost effectiveness- Cost of quality system- Benefit in total cost –Cost Measuring system- TOM- concept, awareness, aspects training

**Paper V (AHS 15): ENGLISH**

**Course Description:** The course is designed to enable students to enhance ability to comprehend spoken and written English (and use English) required for effective communication in their professional work. Students will practice their skills in verbal and written.

**Course Outcome**
1. **CO1:** Develop their intellectual, personal and professional abilities.
2. **CO2:** Acquire basic language skills (listening, speaking, reading and writing) in order to communication with speakers of English language
3. **CO3:** Acquire the linguistic competence necessarily required in various life situations

<table>

</table>
| I    | 10           | **Speak and write grammatically correct English** | * Review of grammar  
* Remedial study of grammar  
* Building vocabulary  
* Phonetics  
* Public speaking | * Demonstrate use of dictionary  
* Class Room conversation  
* Exercise on use of grammer  
* Practice in public speaking | * Objective type  
* Fill in the blanks  
* Para Phrasing |
| II   | 10           | **Develop ability to read, understand and express meaning fully, the prescribed text** | * Read and comprehend prescribed course books | Exercise on :  
* Reading  
* Summarizing  
* Comprehension | * Short answers  
* Essay Type |
| III  | 8            | **Develop writing skills** | * Various forms of Composition  
* Letter writing  
* Note taking  
* Precise writing  
* Anecdotal records  
* Diary writing  
* Reports on health Problems etc.  
* Resume / CV | Exercise on writing :  
* Letter  
* Note  
* Precise  
* Diary  
* Anecdote  
* Health problems  
* Story writing  
* Resume / CV  
* Essay Writing  
* Discussion on written reports / documents | * Assessment of the skills based on the check list |
### IV 6 Develop skill in spoken English

<table>
<thead>
<tr>
<th>Spoken English</th>

During the second year the students will be posted in the clinical area from 8 AM to 5 PM includes didactic lecture from 2 PM to 3 PM.

Internal Assessment

Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks along with performance in the clinical posting.

******************************************

Paper VI: CARDIAC ANATOMY & CARDIAC PHYSIOLOGY BCVT21

Course outcome:
1. CO1: Detailed knowledge in Cardiac Anatomy.
2. CO2: Detailed knowledge in cardiac physiology.
3. CO3: Detailed knowledge in conduction system of heart

Cardiac Anatomy

Anatomy of Heart:
- Surface anatomy,
- Gross anatomy, cardiac chambers, septa, valves,
- Pericardium

Arteries, Veins, Lymphatics
- Aorta and branches
- Venous drainage
- Pulmonary vessels and circulation
- Coronary circulation and coronary venous drainage

Conduction System of Heart
Cardiac Physiology

- Normal Cardiac Cycle
- Pulse
- Heart rate
- Blood pressure
- Cardiac output
- Heart Sounds, Murmurs
- Measurement of Blood Pressure: Technique: Sphygmomanometer
- ECG and Cardiac Cycle
- Physiology of Arrhythmias
- Chambers: Pressures, Wave Forms
- Arterial, Venous Pressures and Wave Forms
- Oxygen Saturations: Physiology of Oxygen Transport
- Blood Gases – Technique and Various parameters
- Various Gas laws
- Flow, pressure and resistance
- Physics of Cardiac Perfusion
- Cardiac Cycle, Circulation, Tissue Perfusion – Unified Concept

************************************

Paper VII: CARDIOVASCULAR TECHNOLOGY – CLINICAL BCVT22

Course outcome:
1. CO1: Basic knowledge in Radiation Physics and Application, Medical Electronics.
2. CO2: Basic knowledge in ECG.
3. CO3: Basic knowledge in Exercise ECG.
4. CO4: Basic knowledge in echocardiography

Radiation Physics and Application, Medical Electronics

- Two dimensional X-ray technique
- Fluoroscopy
- Video Fluoscopy
- X-ray tube
- Absorption and scattering
- X-ray spectrum and extra filtering
- Image enhancement
• Flat panel technology
• Room shielding
• Personnel reduction
• Patient dose reduction
• Symptoms of Radiation Toxicity
• Registration and monitoring
• Biological risk
• Ergonomics
• Introduction to basic principles of medical electronics
• Calibration operation and clinical applications

**Electrocardiography**

- Basics and Principle
- Electrode / Lead Placements
- Normal ECG: Wave Form
- Normal ECG: Intervals
- ECG Machines: Functions, Frequency Response, Recording Speed, Sensitivity, Standardization, Stylus Lag (Heat Stylus)
- ECG and Chamber Hypertrophy
- ECG and Arrhythmia
- ECG in Myocardial Infarction, Myocardial Ischemia
- ECG in Miscellaneous Conditions: Metabolic, electrolyte changes
- ECG for Technician: Summary

**Exercise ECG**

- Equipments / Types of Exercise ECG
- Indication / Contradiction
- Lead Placement – Rationale, Limitation
- Monitoring during Ex. ECG: Clinical / ECG / Parameters
- Exercise ECG Protocol: Indications / Advantage and Disadvantage
- Exercise Physiology
- Exercise ECG: Preparation of Patient / Equipment / Defibrillators, Emergency Drugs
- Exercise ECG: Detection of Various Arrhythmias, Ischemia, and

**Plan of action**

- Exercise ECG:
- Endpoints: Recognition and Action
- Post Exercise ECG: Observation, Instructions

**Echocardiography**

- Principle of Echocardiography
- Transducers
- Anatomical Planes for Viewing in Echocardiography
- Normal M-Mode Echo Study: Anatomy / Function:

**Measurements**

- Normal 2D Echo Study: Anatomy / Function: Measurements.
- Echo for Cardiac Function- systolic and diastolic
- Echo in Heart Disease: Acquired
- Echo in Heart Disease: Congenital
- Contrast Echocardiography: Technique and Indications
- Transesophageal echocardiography
- 3D Echocardiography
- Echo Cardiography: Technician’s Role:
  - Disposables
  - Archiving
  - Record Keeping
  - Stock-Indents, Stock Maintenance, Stock Verification

**Principle of Doppler**

**Measurement of Flows and Gradients**

- Assessment of gradients, shunts, valve areas, cardiac output
- Assessment of valve regurgitations

**Utility of Doppler in Assessment of Cardiac Disease**

- Tissue Doppler
  
  Stress Echocardiography: Protocols, 2D Echo Views, Analysis
  
  Trans-esophageal Echo
  - Indication / Contraindication
  - Patient Preparation
  - Transducer: Maintenance, Sterilization, Handling etc.
  - Monitoring
  - Emergency Drugs
  - Utility

Intra Vascular Ultrasound, Intracoronary Doppler wire

**Holter Recording**
- Principles of Holter
- Utility and indications
- Analysis of Holter

********************************************************************

THIRD YEAR

Duration of Posting of trainees in different stations during training period

<table>
<thead>

<td>-</td>
<td>10 months</td>
</tr>
</tbody>
</table>

During the third year the students will be posted in the clinical area (Cath lab) from 7 AM till the cases finishes in the cath lab including one hour hour didactic lecture.

Internal Assessment

Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks along with performance in the clinical posting.

********************************************************************

Paper VIII: CARDIAC PATHOLOGY AND PHARMACOLOGY BCVT31

Course outcome:
1. CO1: Basic knowledge in cardiac pathology.
2. CO2: Basic knowledge in cardiac pharmacology.
3. CO3: Basic knowledge in cardiac monitoring

- Coronary artery disease and myocardial infarction
- Rheumatic Fever
- Valvular Heart Disease
  - Mitral stenosis
  - Mitral regurgitation
  - Aortic stenosis
  - Aortic regurgitation
  - Tricuspid valve disease
  - Combined valve diseases
▪ Microbiology of Valvular Heart Disease
▪ Pericardial, Myocardial Diseases including End myocardial Diseases
▪ Hypertension
▪ Pulmonary Hypertension
▪ Congenital Heart Disease:
  ▪ Acyanotic
  ▪ Cyanotic
▪ Shunts
  ▪ Left to Right Shunts
  ▪ Right to Left Shunts
▪ Heart Failure
▪ Invasive Monitoring, CVP, Intra Arterial BP, PA Wedge Pressure, Cardiac Output

Pharmacology
▪ Modes / routes of Drug Administration (Rationale)
▪ Intra Venous Fluids: Crystalloids, Colloids
▪ Common Cardiac Drugs – PART-I: Digoxin, Diuretics, Vasodilators, Nitrates
▪ Common Cardiac Drugs – PART-II: Beta Blockers, Calcium Blockers, ACE inhibitor
▪ Common Cardiac Drugs – PART-III: Antiarrhythmic drugs, Positive inotropic drugs
▪ Drugs for Cardiac Resuscitation
▪ Drugs for all Cardiac and Medical Emergencies
▪ Contrast Media
▪ Adverse Reactions to Contrast Media
▪ Heparin, Protamine
▪ Identification of Anaphyaxis and Immediate Management
▪ Drug reactions, Drug interaction (Basics)

*****************************************************************************

Paper IX: CARDIOVASCULAR TECHNOLOGY – APPLIED BCVT32

Course Outcome:
1. CO1: Basics in Cardiac Catheterization lab.
2. CO2: Detailed knowledge in Equipments in Cath-Lab.
3. CO3: Detailed knowledge in Log Books, Registers in lab.
4. CO4: Detailed knowledge and technical expertise in various diagnostic and therapeutic procedures in cathlab
Cardiac Catheterization Part I

- Cardiac Catheterization: Laboratory Setup / Types of Procedures
- Sterile Techniques in Cath Lab / Sterile Areas, Sterile Procedure, sterile trolley setting, Scrubbing, gowns and Gloves, scrubbing and draping Patients, handling sterile disposables etc.
- Sterilization and re-use of hardware
- Equipments: Cath-Lab Equipments
  - Defibrillator / Pacemaker / IABP / BOYLE’s Apparatus / Suction Machine/oxygen
  - Infusion Pumps / Programmed Stimulators, Pacing System Analyzers
- Equipments in Cath-Lab
  - Hemodynamic Recorders (Physiological Records)
  - Transducers
  - Recording of Pressure Wave Form:
- Range / Gain / Speed / Systolic / Diastolic And Mean Pressures In Chambers And Vessels
- Hazard Management
  - Radiation Protection
  - Infection Prevention
  - Injury Prevention: Electrical /Mechanical
- Wastes Management
  - Plastics
  - Biological Wastes
  - Glass / Needle / Syringes
  - Metallic Waste
- Technician’s Role
  - Patient monitoring
  - Procedure Related : Data collection
  - Acquisition and entry of Data, Procedure Books,
  - Handling of Equipment
- Log Books, Registers etc.
  - Stock of all disposables Eg: Catheters etc.
  - Stores (Disposable Items)
  - Accounting (Used Items)
- Equipment Maintenance
• Cine Angiography: Cine Filming, Cine Film Processing and Cine Film Viewing, cine film library
• Contrast Media

**Cardiac Catheterization – Part-II**

• Cardiac Catheterization Procedure: Diagnostic Studies
• Cardiac Catheterization Procedure: Therapeutic / Interventional Procedures
• Acquisition of Cath Data: Cardiac Output / Oximetry and Shunts
• Acquisition of Cath Data: Pressures and Wave Forms; Recording Technique, Analysis
• Angiography: Technique / Views / Contrast Media
• Cardiac Catheterization
• Application of Echocardiography
• Hardware: Catheters / Connections / Sheaths / Stopcocks / Wires / Angioplasty Catheters
• Complication of Cardiac Catheterization: Recognition and management
• Cardiopulmonary Resuscitation
• Special Procedures:
  ◦ Pericardial Tap
  ◦ Atrial Septostomy
  ◦ Endomyocardial Biopsy
  ◦ Balloon Angioplasty (Valve)
  ◦ Coronary Angioplasty
• Case Study of Simple Cardiac Disease
  ◦ ASD, MS, Tetralogy of Fallot
• Hardware Of Cardiac Catheterization And Interventions
• Venous and Arterial Check Flow Sheaths, Manifolds, 3-Way Stock Cocks etc.
• Guide Wires and Dilators
• Puncture Needles (Vascular Access Needles)
• Woven Dacron Catheters: GL, NIH, Lehman, Woven Dacron Electrode Catheters
• Flow Directed Catheters (Swan Ganz Type) Balloon Angio Catheters
• Polyurethane Catheters: Pig Tail, Judkins, Coronary, Amplatz Coronary, Brachial Coronary, Sones Catheters
• Guide Wires: Short, Normal Length, Exchange Length ‘J’ Tipped Movable Core, Tips, Deflectable Types
• Valvuloplasty Catheters, Atrial Septostomy Catheters
• Coronary Angioplasty: Guide Catheters, Guide Wire, Balloon Dilatation Catheters, Indiffiators, Y Connectors
  ◦ Stents: Bare Stents, Mounted Stents, Other Types of Stents

*****************************************************************************

B.Sc Cardiovascular Technology
Paper X: CARDIOVASCULAR TECHNOLOGY – ADVANCED BCVT33

Course outcome:
1. CO1: Detailed knowledge in Pacing and Electrophysiology.
2. CO2: Basic knowledge in the management of complications in lab.
3. CO3: Recent advances in cardiovascular Technology

Pacing and Electrophysiology

- Arrhythmias: Brady and Tachy Arrhythmias
- Indication For Temporary / Permanent Pacing Technique: Temporary Pacing
- Permanent Pacing: VVI, AAI Pacing (Single Chamber Pacing)
- Permanent Pacing: DDD, other Modes of Pacing
- Septal defect Closure materials
- Pacemaker Clinic: Management of Pacemaker Patients, programmers
- Intracardiac Electrogram – Technique
- Intracardiac Electrogram – Analysis, Intervals etc.
- Electrophysiological Studies
- Radio Frequency Ablation for Arrhythmia’s
- Implantable Cardioverter Defibrillator
- Cardiac Arrest
- Cardio Respirator Resuscitation
- Hypotension / Hypertensive Crisis
- Cardiac tamponade
- Cardiac Trauma
- Anaphylaxis
- Emergency Drugs
- Intra-aortic Balloon Pump
- Records Keeping: Indents, Stocks, Log Books, Procedure Books etc.
- Applications of ECMO(Extracorporeal Membraneous Oxygenation)

PATTERN OF QUESTION PAPERS

5. Paper I to Paper IV

The duration of each theory paper will be three hours; the paper will have two sections (Section A & Section B) each carrying 50 marks and a total of 100 marks.

Pattern of Question Paper

<table>
<thead>
<tr>
<th>Structured Essay (2 out of 2)</th>
<th>20 marks (2 x 10 marks)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Short Notes (3 out of 4)</td>
<td>15 marks (3 x 5 marks)</td>
</tr>
<tr>
<td>Short answer question (5 out of 7)</td>
<td>15 marks (5 x 3 marks)</td>
</tr>
</tbody>
</table>

Total Marks - 50 marks

6. Paper V

The duration of Paper V will be two hours; the paper will have only one section for a total of 50 marks.

Pattern of Question Paper

| English Grammar                | 20 marks                  |
| English Writing                | 30 marks                  |

Total Marks - 50 marks

7. Paper VI to Paper X

The duration of each theory paper will be three hours; the paper will have only one section of 100 marks.

Pattern of Question Paper

<table>
<thead>
<tr>
<th>Structured Essay (4 out of 4)</th>
<th>40 marks (4 x 10 marks)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Short Notes (6 out of 8)</td>
<td>30 marks (6 x 5 marks)</td>
</tr>
<tr>
<td>Short answer question (10 out of 12)</td>
<td>30 marks (10 x 3 marks)</td>
</tr>
</tbody>
</table>

Total Marks - 100 marks
