PROGRAM
BSc Diabetes Sciences
(Revised with effect from 2014-2015 onwards)
SPIRITUAL PRINCIPLES IN EDUCATION

“In the gurukulas of ancient rishis, when the master spoke it was love that spoke; and at the receiving end disciple absorbed of nothing but love. Because of their love for their Master, the disciples’ hearts were like a fertile field, ready to receive the knowledge imparted by the Master. Love given and love received. Love made them open to each other. True giving and receiving take place where love is present. Real listening and ‘sraddha’ is possible only where there is love, otherwise the listener will be closed. If you are closed you will be easily dominated by anger and resentment, and nothing can enter into you”.

“Satguru Mata Amritanandamayi Devi”
Amrita Institute of Medical Sciences

Since its inception, Amrita Institute of Medical Sciences (AIMS) in fifteen short years has grown from a 115 bed specialty hospital to a 1250 bed super-specialty tertiary care health centre with an attached medical school and hospital. On the 17th of May 1998, AIMS was inaugurated by the Prime Minister of India, Shri Atal Bihari Vajpayee, in the presence of Her Holiness, Sri Mata Amritanandamayi Devi. The Amrita Institute of Medical Sciences is the adjunct to the term “new universalism” coined by the World Health Organization. This massive healthcare infrastructure with over 9,00,000 sq. ft of built-up area spread over 100 acres of land supports a daily patient volume of approx 3000 outpatients and an average of 135 admissions. Annual patient turnover touches an incredible figure of over 9,00,000 outpatients and nearly 41,000 inpatients.

With extensive facilities comprising 28 modern operating theatres, 220 equipped intensive-care beds, a fully computerized and networked Hospital Information System (HIS), a fully digital radiology department, a 24/7 telemedicine service and a comprehensive well-equipped clinical laboratory, AIMS offers a total and comprehensive health solution comparable to the best hospitals in the world. AIMS features one of the most advanced hospital computer networks in India. The network supports more than hundreds computers and has computerized nearly every aspect of patient care including all patient information, lab testing and radiological imaging. The AIMS team comprises physicians, surgeons and other healthcare professionals of the highest calibre and experience. Our Hospital services are accredited by ISO 9001-2008 and National Accreditation Board for Hospitals & Healthcare Providers (NABH) and lab services by National Accreditation Board for Testing and Calibration Laboratories.

The educational institutions of Amrita Institute of Medical Sciences, which include the Amrita School of Medicine, the Amrita School of Dentistry, the Amrita College of Nursing, the Amrita School of Pharmacy and Amrita Centre for Allied Health Sciences are committed to being centres of excellence providing value-based medical education, where the highest human qualities of compassion, dedication, purity and service are instilled in the youth. Amrita Institute of Medical Sciences strives to help all students attain the competence and character to humbly serve humanity in accordance with the highest principles and standards of the healthcare profession.

Based on evaluation of all our University campuses and programs by a peer review committee, the university has been accredited by the National Assessment and Accreditation Council (NAAC) with an ‘A’ grade. Amrita has also been ranked in the Ivy League of Indian Universities along with Indian Institute of Science, Bangalore, Tata Institute of Fundamental Research (TIFR), Mumbai etc. in a review of deemed universities by the Ministry of Human Resource Development (MHRD) of the Government of India. In a recent review of Deemed Universities by a high-power committee of reputed academicians, popularly known as the Tandon Committee, set up by the Ministry of Human Resources Development, Amrita Vishwa Vidyapeetham was placed in Category 1. In Tamil Nadu, besides Amrita, only the Chennai Mathematical Institute, a Deemed University, was given this recognition.

I.2. Medium of Instruction:

English shall be the medium of instruction for all subjects of study and for examinations.

I.3. Eligibility:

Generally Science Graduates with Physics, Chemistry, and Biology are eligible for admission to the Under Graduate Courses except in respect of certain specialties for which other qualification or subjects are specifically called for. Essential qualifications for eligibility are mentioned under clause I.1

II. General Rules:

Admissions to the courses will be governed by the conditions laid down by the University from time to time and as published in the Regulations for admissions each year.

II.1. Duration of the Course

Duration details are mentioned under clause No.I of this booklet.

Duration of the course : 4 Years (3 years + 1 year Internship except for courses at serial number 1 and 2 in clause I.1)
Weeks available per year : 52 weeks
Vacation / holidays : 5 weeks (2 weeks vacation + 3 weeks calendar holidays)
Examination (including preparatory) : 6 weeks
Extracurricular activities : 2 weeks
Weeks available : 39 weeks
Hours per week : 40 hours
Hours available per academic year : 1560 (39 weeks x 40 hours)

Internship wherever specified are integral part of the course and needs to be done in Amrita Institute of Medical Sciences, Kochi itself.

II.2. Discontinuation of studies

Rules for discontinuation of studies during the course period will be those decided by the Chairman /Admissions, Amrita School of Medicine, and Published in the "Rules and Regulations" every year.

II.3. Educational Methodology

Learning occurs by attending didactic lectures, as part of regular work, from co-workers and senior faculty, through training offered in the workplace, through
reading or other forms of self-study, using materials available through work, using materials obtained through a professional association or union, using materials obtained on students own initiative, during working hours at no cost to the student.

II.4. Academic Calendar

Course will follow and annual scheme as per details mentioned under:

FIRST YEAR

Commencement of classes – August
First sessional exam – November
Second sessional exam – February
Model Exam (with practical) – May - June
University exam (with practical) – June - July
Annual Vacation – After the University examination.

SECOND YEAR

Commencement of classes – August
First sessional exam – November
Second sessional exam – February
Model Exam (with practical) – May - June
University exam (with practical) – June - July
Annual Vacation – After the University examination

THIRD YEAR

Commencement of classes – August
First sessional exam – November
Second sessional exam – February
Model Exam (with practical) – May
University exam (with practical) – June
Annual Vacation – After the University examination.

INTERNSHIP

Commencement of internship – 01 August
Completion of internship – 31 July
III. Examination Regulations:

III.1. Attendance:

80% of attendance (physical presence) is mandatory. Medical leave or other types of sanctioned leaves will not be counted as physical presence. For those who possess a minimum of 75% attendance, deficiency up to 5% may be condoned on medical or other genuine grounds by the Principal at his sole discretion and as per the recommendation of the Heads of Departments concerned. Students are allowed such condonation only once for entire course of study. Condonation fee as decided by the Principal has to be paid. Attendance will be counted from the date of commencement of the session to the last day of the final examination in each subject.

III.2. Internal Assessment:

1. Regular periodic assessment shall be conducted throughout the course. At least two sessional examinations in theory and preferably two practical examinations should be conducted in each subject. The model examination should be of the same pattern of the University Examination. Average of the two examinations and the marks obtained in assignments / oral / viva / practicals also shall be taken to calculate the internal assessment.

2. A candidate should secure a minimum of 35% marks in the internal assessment in each subject (separately in theory and practical) to be eligible to appear for the University examination.

3. The internal assessment will be done by the department thrice during the course period in a gap of not more than three months and model exam will be the same pattern of university examination. The period for sessional examinations of academic year are as follows:

- First Sessional Exam : November
- Second Sessional Exam : February
- Model Exam : May / June

4. Each student should maintain a logbook and record the procedures they do and the work patterns they are undergoing. It shall be based on periodical assessment, evaluation of student assignment, preparation for seminar, clinical case presentation, assessment of candidate’s performance in the sessional examinations, routine clinical works, logbook and record keeping etc.
5. Day to day assessment will be given importance during internal assessment. Weightage for internal assessment shall be 20% of the total marks in each subject.

6. Sessional examination as mentioned above will be conducted and secured by the students along with their attendance details shall be forwarded to the Principal (Result of the first sessional examination should reach before December 1st week of the academic year and result of the second sessional examination should reach to the Principal before March 1st week of the academic year)

7. Third sessional examinations (model exam) shall be held three to four weeks prior to the University Examination and the report shall be made available to the Principal ten days prior to the commencement of the university examination.

### III.3. University Examinations:

- University Examination shall be conducted at the end of every academic year. A candidate who satisfies the requirement of attendance and internal assessment marks, as stipulated by the University shall be eligible to appear for the University Examination.
- One academic year will be twelve months including the days of the University Examination. Year will be counted from the date of commencement of classes which will include the inauguration day.
- The minimum pass marks for internal assessment is 35% and for the University Examination is 45%. However the student should score a total of 50% (adding the internal and external examination) to pass in each subject (separately for theory and practical)
- If a candidate fails in either theory or practical paper, he/she has to reappear for both the papers (theory and practical)
- Maximum number of attempts permitted for each paper is five (5) including the first attempt.
- The maximum period to complete the course shall not exceed 6 years.
- All practical examinations will be conducted in the respective clinical areas.
- Number of candidates for practical examination should be maximum 12 to 15 per day
- One internal and external examiner will jointly conduct the theory evaluation and practical examination for each student during the final year.
III.4. Eligibility to appear university Examination:

A student who has secured 35% marks for Internal Assessment is qualified to appear for University Examination provided he/she satisfies percentage of attendance requirement as already mentioned at the III (1).

III.5. Valuation of Theory – Revaluation Papers:

1. Valuation work will be undertaken by the examiners in the premises of the Examination Control Division in the Health Sciences Campus.
2. There will be **Re-Valuation** for all the University examinations. Fees for revaluation will be decided by the Principal from time to time.
3. Application for revaluation should be submitted within 5 days from date of result of examination declared and it should be submitted to the office with payment of fees as decided by the Principal.

III.6. Supplementary Examinations:

Every main University examination will be followed by a supplementary examination which will normally be held within four to six months from the date of completion of the main examination.

As stipulated under clause No. III.2 under Internal Assessment, HOD will hold an internal examination three to four weeks prior to the date of the University Examination. Marks secured in the said examination or the ones secured in the internal examination held prior to the earlier University Examination whichever is more only will be taken for the purpose of internal assessment. HODs will send such details to the Principal ten days prior to the date of commencement of University examination.

Same attendance and internal marks of the main examination will be considered for the supplementary examination, unless the HOD furnishes fresh internal marks and attendance after conducting fresh examination.

Students who have not passed / cleared all or any subjects in the first University examination will be permitted to attend the second year classes and also eligible to appear for second year university examination along with first year supplementary examination. However, he / she can appear for the third (final) year university examination, only if he / she clear all the subjects in the first as well as in the second year examinations.

Students of supplementary batches are expected to prepare themselves for the University Examinations. No extra coaching is expected to be provided by the Institution. In case at any time the Institution has to provide extra coaching, students will be required to pay fees as fixed by the Principal for the said coaching.
III.7. Rules regarding carryover subjects:

A candidate will be permitted to continue the second and third year respectively of the course even if he/she has failed in the first or second year university examinations.

A candidate must have passed in all subjects to become eligible to undergo compulsory internship of one year. For the candidates who have not passed all the subjects the duration of the third year shall be extended until they become eligible to undergo compulsory internship.

IV. Criteria for Pass in University Examination - Regulations:

IV.1. Eligibility criteria for pass in University Examination:

In each of the subjects, a candidate must obtain 50% in aggregate for a pass and the details are as follows:

- A separate minimum of 35% for Internal Assessment.
- 45% in Theory & 35% in Oral / Viva.
- A separate minimum of 50% in aggregate for Practicals / Clinics (University Examinations).
- Overall 50% is the minimum pass in subject aggregate (University Theory + Viva / Oral + Practicals + Internal Assessment).

IV.2. Evaluation and Grade:

1. Minimum mark for pass shall be 50% in each of the theory and practical papers separately (including internal assessment) in all subjects except English. Only a minimum of 40% is required to pass in English.

2. A candidate who passes the examination in all subjects with an aggregate of 50% marks and above but less than 65% shall be declared to have passed the examination in the second class.

3. A candidate who passes the examination in all subjects in the first attempt obtaining not less than 65% of the aggregate marks for all the three years shall be declared to have passed the examination with First Class.

4. A candidate who secures an aggregate of 75% or above marks is awarded distinction. A candidate who secures not less than 75% marks in any subject will be deemed to have passed the subject with distinction in that subject provided he / she passes the whole examination in the first attempt.

5. A candidate who takes more than one attempt in any subject and pass subsequently shall be ranked only in pass class.

6. A Candidate passing the entire course is placed in Second class / First class / Distinction based on the cumulative percentage of the aggregate marks of all the subjects in the I, II and III (Final) university examinations.

7. Rank in the examination : - Aggregate marks of all three year regular examinations will be considered for awarding rank for the B.Sc Graduate Ex-
amination. For the courses where the number of students are more than 15 only, rank will be calculated as under:

- Topmost score will be declared as First Rank.
- Second to the topmost will be declared as Second Rank.
- Third to the topmost will be declared as Third Rank.
- There will be no ranking if the candidate is less than 15.

V. Internship:

V.1. Eligibility for Internship - Regulations:

Wherever internship is a part of the curriculum, students will have to do the internship in Amrita Institute of Medical Sciences itself. A candidate must have passed in all subjects to become eligible to undergo compulsory internship of one year or a period fixed in the curriculum.

“Internship has to be done continuously for a period provided in the syllabus except in extra ordinary circumstances where subject to the approval of the Principal the same may be done in not more than two parts with an interruption not exceeding six months. In any case Internship shall be completed within 18 months from the date of acquiring eligibility to do the internship.

V.2. Attendance and leave details during Internship:

For 30 days of duty an intern will be eligible for casual leave and one weekly off. For all Under Graduate courses, the period of internship will be one year and so an intern is eligible for one casual leave and one weekly off in a month and total 12 days casual leave is permitted during internship for a student. For example if a student has taken more than 15 days leave in an emergency situation, then he/she is permitted 12 days as casual leave and the remaining 3 days she/he has to compensate by doing duty for 3 days after expiry of the original date.

A Student will become eligible to receive his/her degree only after completion of internship to the complete satisfaction of the Principal.

VI. General considerations and teaching / learning approach:

There must be enough opportunities to be provided for self learning. The methods and techniques that would ensure this must become a part of teaching-learning process.

Proper records of the work should be maintained which will form the basis for the students assessment and should be available to any agency who is required to do statutory inspection of the school of the course.
Part II
Syllabus
INTRODUCTION AND ADVANCEMENT

As the number of people with diabetes increases, so does the need for diabetes-aware skilled healthcare providers. The gap between the available health resources and our healthcare requirements is set to widen: as ongoing large-scale rural-urban migration and industrialization continue to drive the current epidemic of obesity and overweight, diabetes has become one of the major obstacles to good health and well-being worldwide.

This course is intended to train Diabetes Educators who would assist doctors in their clinic in managing diabetic patients. Diabetic educators will be able to counsel patients about diet, initiate insulin therapy, provide psychological support etc; on an individual basis and also conduct group education sessions on Diabetes to patients and their relatives. They will also learn basics of Medical nutrition therapy, basic podiatric care and essential statistics which would enable them to give dietary advice, podiatric care and conduct clinical audits and data entry. This course will enable the successful candidate to be posted as an assistant to a Diabetologist in a clinic or hospital, specializing in Diabetes to assist the physician in clinical tasks and also participate in clinical management.

MAIN OBJECTIVES OF THE COURSE

**Outpatient services:**
1. Record the detailed diabetes history and clinical findings of new patients and document in EMR.
2. Provide guidance to new patients and advise patients on appropriate investigations prior to consultation.
3. Help Physicians in all matters concerning to the patient care.
5. Provide counseling and education to patients in diet and exercise. Teach Insulin injection techniques, Blood glucose monitoring using Glucometers to patients.
6. To learn drafting medical certificates reply to referral letters.
7. Assist physicians for clinical procedures when needed.
8. Skills to be learnt- bone densitometry, ABI, Biothesiometry, Pedopodogram, Ultrasound, Anodyne therapy, TcPO2 monitoring, CGMS insertion, Insulin pump insertion and assistance
9. To design and organize community services such as patient camps, workshop etc
10. To learn entering data into SPSS or Excel and do the basic statistics

**Inpatient services:**
1. Take detailed diabetes history and assess the level of knowledge by talking to patients and relatives.
2. Take part in ward rounds when needed and bring the problems faced by the patients to the attention of the doctors.
3. Verify the knowledge and correct the insulin delivery technique and glucose monitoring in the inpatients.
4. Provide psychological support to patients and relatives.
5. Provide detailed dietary advice
6. Assist in Diabetic foot surgeries when needed
7. Follow up and education of diabetic foot patients.
8. Ensuring patient awareness regarding patient education materials available such as Diabeat, booklets, CDs etc.

Program Outcomes (PO)
1. PO1: Fundamental knowledge on the subject.
2. PO2: Effective communication skills.
3. PO3: Knowledge in professional ethics.
4. PO4: Leadership qualities and team work.
5. PO5: Problem Analysis and solving skills.
6. PO6: Basic knowledge on research methodology.
7. PO7: Higher Technical skills and competencies.
8. PO8: Higher study options in many fields.
9. PO9: Employability in various sectors.
10. PO10: Higher earnings.

Program Specific Outcomes (PSO)
1. PSO1: Basic knowledge of different types of Diabetes, Medical Nutrition therapy, Basic Podiatry care and essential statistics
2. PSO2: Basic knowledge about the principles and operations of all Glucometer, CGMS, AB-Index, VPT, Pedopodogram, TcPo2 and VAC machine
3. PSO3: Basic knowledge on normal values of blood sugar and related investigation interpretation of results.
4. PSO4: Core knowledge on Types of Insulin and insulin delivery devices including insulin pump, Incretins and other Oral Anti Diabetic agents for Diabetes management.
5. PSO5: Employability as Diabetes Educator to counsel patients about Diet, initiate insulin therapy, provide psychological support to the patients in Hospitals
6. PSO6: Able to take detailed Diabetes history, verify the knowledge and correct the insulin delivery technique and glucose monitoring both for outpatients and Inpatients also can sort problems faced by the patients to the attention of doctors during ward rounds
7. PSO7: Can provide psychological support and detailed Dietary advice to the patients
8. PSO8: Can conduct group education sessions on Diabetes in community through schools, Both private and Public Institutions and other Social sectors.

Course Outcomes of the Elective Course

**BDDBS40**

Value Based Education
CO1: The attitude to be a good human being, with the curiosity to continue lifelong learning.
CO2: The conviction to do service to humanity - to put the interests of the individual patient as the foremost priority. Acquisition of values of gender sensitivity, environment & sustainability.
CO3: Acquisition of the “skills for life” in addition to the skills to live.
CO4: Acquisition of positive lifelong values including ethics and etiquette.
CO5: The “practical applications” of the right values

**First year**
Theory classes and practicals of following subjects
- Anatomy
- Physiology
- Biochemistry
- Pharmacology
- Microbiology
- Pathology
- Introduction to Computer Application
- Quality Assurance & Accreditation
- English

**Second year**
Theory class and posting in the clinical area
- Basic Sciences & Basics of Diabetes
- Pathophysiology & Long Term Complications of Diabetes

**Third year**
Theory class and posting in the clinical area
- Medical Nutrition Therapy
- Management of Diabetes and Diabetes Education
- Basics of Podiatry

**Fourth Year**
Fourth year is internship in the clinical area

**FIRST YEAR**
During the first year the students will have didactic lecture in the medical college from 10 am to 4 pm

**Internal Assessment**
Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks.

******************************************************************************

**Paper I – AHS11**
**Section A: ANATOMY**

**COURSE OBJECTIVE:**
An outline of anatomy with special emphasis on applied aspects is provided to the students for better understanding of the technical and diagnostic procedure.

**Course Outcome:**
1. Knowledge of general anatomy and locomotion.
2. Knowledge of basic human anatomy and histology of CVS and Respiratory systems.
3. Knowledge of basic human anatomy and histology of CNS, GI, excretory and reproductive systems.
4. Knowledge of basic human anatomy and histology of endocrine system and special senses.

1. The human body as a whole
   Definition
   Sub divisions of anatomy
   Terms of location and positions
   Fundamental planes, Vertebrate structure of man
   Organization of body cells and tissues

   1 hour

2. Locomotion and Support
   The Skeletal System
   Types of bones
   Structure and growth of bones
   Divisions of the skeleton
   Appendicular skeleton, Axial skeleton
   Name of all the bones and their parts
   Joints: Classification, Types of movements with examples
   Muscles: Structure, classification, muscles of abdominal wall, muscles of
   Respiration, pelvic diaphragm, muscles of head and neck

   8 hours

   Practicals:
   Demonstrations of all bones:
   Showing parts
   Joints, X-rays of all normal bones and joints
   Muscles: Classification of muscle

   2 hours

3. Anatomy of nervous system
   Introduction and divisions of nervous system
   Central nervous system: Spinal cord, Anatomy, and functions, Reflex arc
   The Brain:
   Location, gross features, parts, functional areas
   Hindbrain, Midbrain, fore brain
   Coverings of brain and peripheral nervous system
   anatomy of cerebral blood supply& coverings
   Spinal cord –gross features, extent, blood supply and coverings
   Injuries to spinal cord and brain
   Peripheral nervous system – organization& structure of a typical spinal nerve

   6 hours

   Practicals:
   Demonstration of brain and spinal cord

   1 hour

4. Anatomy of Cardiovascular system
   Gross anatomy & Structural features of the Heart and Great vessels:
   Heart
   Location, size, surface features, pericardium & valves
   Right Atrium :- structural features
   Venous area, Septum and atrial appendage
   Right Ventricle :- structural features, inflow & Out flow characteristics
   Left Atrium :- structural features, venous area, Septum and appendage

   2 hours
Left ventricle :- structural features, inflow & out flow characteristics
Valves :- valve apparatus, location
Structure & functions of each valve
Blood Supply of heart :- coronary arteries, cardiac cycle
Innervations :- sympathetic and parasympathetic sensory
Pulmonary circuit-names of the arteries and veins & positions
Lymphatic drainage of the Heart

**Great Vessels**
Structure of blood vessels and its organization
Aorta
Pulmonary artery & pulmonary vein
General plan of systemic circulation
Pulmonary circulation

**PRACTICALS**
Demonstration to illustrate normal angiograms.
Demonstration of surface features & interior of the heart
Demonstration of aorta and its branches
Histology of cardiac muscles and artery

5. **Anatomy of the Respiratory system**
Organs of Respiratory System:
Conducting portion, respiratory portion.
(Nose –nasal cavity, paranasal air sinuses
Larynx,trachea,bronchial tree)
Muscles of Respiration
Cross structure and the interior features of nose & nasal cavity
Para nasal air sinuses
Cross structure and interior features of the pharynx and larynx
Cross structures and interior features of the trachea and bronchial tree
Gross structure, histology, position and coverings of the lungs
Pulmonary circulation – pulmonary arteries pulmonary veins & bronchial arteries
Nerve supply to the respiratory system

**Practicals**
Demonstration of the parts and function
Demonstration of the different parts of the respiratory system with special emphasis
On lungs
Histology of lungs

6. **Anatomy of the digestive system**
Components of the digestive system
Alimentary tube
Mouth, tongue, tooth
Salivary gland, liver, biliary apparatus and its secretion, pancreas and pancreatic
Secretion, movements of intestine defecation, GI hormones malabsorption and

**Practicals**
Demonstrations of the parts and functions
Normal x-rays
7. Anatomy of excretory system & Reproductive system
1 hour
Organization of the renal system
Kidneys: location, gross features, structure, blood supply and nerve supply
Excretory ducts, ureters, urinary bladder, urethra location gross features and structure
Male reproductive system:
Testis, Duct system, Prostate
Female Reproductive system:
Ovaries, duct system, accessory organs
Practicals
Demonstration of Kidneys, ureter, bladder
Histology of kidney

8. Anatomy of endocrine system
1 hour
Name of all endocrine glands and their positions
Hormones and their functions

9. Histology
6 hours
General Slides:
Hyaline cartilage, Fibro cartilage, Elastic cartilage, T.S & L.S of bone, Blood vessels, Tonsils, Spleen, Thymus, Lymph node, Epithelial tissue, Skeletal and cardiac muscle, Peripheral nerve and optic nerve
Systemic Slides
4. G.I.T
5. Lung-Trachea
6. Kidney, Ureter, Urinary bladder
7. Endocrine- Adrenal, pancreas, pituitary, thyroid and parathyroid
8. Uterus, Ovary, testis

Reference books:
Human Anatomy- Regional and Applied Volume
B.D Chaurasia
Clinical Anatomy For Medical Students
Richard S.Snell

*************

Paper I – Section B: PHYSIOLOGY

Course outcome:
1. CO1: Knowledge of general physiology, nerve-muscle physiology and haematology.
2. CO2: Knowledge of basic human physiology with respect to CVS, Respiratory system and GI system.
3. CO3: Knowledge of basic human physiology of excretion and CNS.
4. CO4: Knowledge of basic human physiology of special senses and endocrine system.

1. INTRODUCTION TO PHYSIOLOGY AND GENERAL PHYSIOLOGY - 1 hr
2. MUSCLE and NERVE - 3 hrs
• Neurons and glial cells - Structure, function, Types, electrical property, degeneration and regeneration.
• Muscle- Structure & Functions of skeletal muscle & smooth muscle
• Neuromuscular transmission – Functional anatomy, Transmission & Clinical importance.

3. HAEMATOLOGY - 9 hrs
• Fluid compartments, Composition & functions of blood, Plasma protein – names, functions.
• Erythrocyte - Morphology, Count, Function, Erythropoiesis, Factors affecting erythropoiesis, Structure of Haemoglobin, Erythrocyte Sedimentation rate, Anaemia, Polycythemia, Fate of RBC, Jaundice.
• Leucocytes - Morphology, Types, Properties & Functions, variations in count.
• Thrombocytes- Morphology, Count, Function, Variations.
• Hemostasis. Coagulation and its disorders.
• Blood groups and its importance, Blood transfusion.
• Tissue fluid and Lymph
• Immunity.

4. CARDIOVASCULAR SYSTEM - 10 hrs
• Organisation of CVS, Properties of Cardiac Muscle, Origin and spread of cardiac impulse
• Cardiac Cycle – Electrical (ECG)and mechanical events,
• Cardiac output, Measurement, (Fick’s Principle) regulation
• Blood pressure, measurement & variation, determinants, regulation, Shock.
• Regional circulation.(Salient features only)-coronary, Pulmonary, Cerebral, Cutaneous

5. RESPIRATORY SYSTEM - 8 hrs
• Introduction. Functional anatomy, Mechanics of ventilation, Pressure changes, volume changes, Surfactant, Compliance, Airway resistance.
• Alveolar ventilation, Dead space, Ventilation perfusion ratio and its significance,
• Spirogram
• Diffusion of gases, O₂ transport, CO₂ transport.
• Regulation of respiration – Voluntary, Neural, Chemical.
• Abnormalities of respiration Hypoxia, Cyanosis, Dyspnea, Asphyxia, High altitude,
• Dysbarism.

6. DIGESTIVE SYSTEM - 7 hrs
• Functional anatomy of GI tract,
• Secretions - Salivary secretion & its regulation, Gastric secretion and its regulation,
• Peptic ulcer, Pancreatic secretion and its regulation, Functions of liver. Bile – storage and functions. Intestinal juice
• Movements - Mastication, Deglutition, Movements of stomach, Small intestine, Large intestine. vomiting, Defecation.
• GI Hormones,
• Digestion & Absorption of carbohydrates, Proteins, Fat & vitamins

7. Excretion - 7 hrs
• Functional anatomy of kidney, Structure and function of kidney and nephron
8. ENDOCRINOLOGY - 6 hrs
   a) Introduction to endocrinology (Different glands, hormones)
   b) Pituitary gland (Anterior and posterior glands, actions and applied aspects)
   c) Thyroid gland (Actions and applied aspects)
   d) Calcium homeostasis (Parathyroid, Vitamin D, Calcitonin, actions and applied aspects)
   e) Pancreas (Endocrine part – insulin, glucagon – actions and applied aspects)
   f) Adrenal cortex and medulla (Actions and applied aspects)

9. REPRODUCTIVE SYSTEM - 3 hrs
   a) Male Reproductive System- Different parts, spermatogenesis, hormones
   b) Female reproductive system – Different parts, Sexual cycles – Menstrual cycles – Ovarian, endometrium
   c) Lactation, Pregnancy & Contraception (Basics only)

10. CENTRAL NERVOUS SYSTEM (Basics only) - 10 hrs
    a) Organization of Nervous system.
    b) Synapse, Properties & Function
    c) Reflexes, Reflex action, Property ,Function.
    d) Sensory system – Receptor, Ascending sensory pathway (basics only), Thalamus, sensory cortex
    e) Motor System – Spinal control of Motor activity, Motor areas in Cerebral Cortex,
    f) Pyramidal & extra pyramidal tracts (basics only),
    g) Basal ganglia & Cerebellum.
    h) Hypothalamus
    i) Autonomous nervous system
    j) Cerebro spinal fluid- formation and functions.

11. SPECIAL SENSES (Basics only) - 4 hrs
    a) Audition
    b) Vision

Revision and evaluation session – 4-5 hours

Reference books:
   Essentials of Medical Physiology
   Anil Baran Singha Mahapatra

  ****************************

Paper II – AHS12
Section A: BIOCHEMISTRY

Course outcome:
1. CO1: Knowledge of biochemistry of cell structure, functions, digestion, enzymes and proteins.
2. CO2: Knowledge of biochemistry of carbohydrates, minerals and vitamins.
3. CO3: Knowledge of biochemistry of liver and renal function tests, specialized laboratory investigations and lipids.
4. CO4: Knowledge of biochemistry of metabolism, homeostasis, nucleic acids and cancer.

I. CELL STRUCTURE & FUNCTIONS
   - Mitochondria
   - Endoplasmic reticulum, Lysosomes
   - Fluid mosaic model for membrane structure

II. DIGESTION AND ABSORPTION OF NUTRIENTS
   1. Digestion of carbohydrates
   2. Fats
   3. Enzymes in digestion of proteins

III. ENZYMES
   - Normal serum range and diagnostic importance of serum AST, ALP,ALT,CK,GGT and AMYLASE.

IV. PROTEINS
   - Essential amino acids
   - Plasma proteins
   - Immunoglobulins

V. CARBOHYDRATES
   - Diabetes mellitus- symptoms and complications
   - Glucose tolerance test
   - Action of insulin and glucagon on carbohydrate metabolism

VI VITAMINS
   - Deficiency manifestations of Vitamin A, C, D, E, K
   - Vit B Complex

VII MINERALS
   - Factors maintaining serum calcium level and important functions of calcium
   - Importance of trace elements

VIII HEMOGLOBIN
   1. Hemoglobin metabolism

IX LIVER FUNCTION TESTS
   - Jaundice and types of jaundice
   - Enzymes in liver disease

X RENAL FUNCTION TESTS
   - Serum Creatinine

XI SPECIALIZED LABORATORY INVESTIGATIONS
   - Principle and applications of
     - Radioimmunoassay (RIA)
     - ELISA
     - Colorimetry

XII LIPIDS
   - Essential fatty acids (EFA)
   - Poly unsaturated fatty acids (PUFA)
• Phospholipids

**XIII METABOLISM**
• TCA cycle (steps only)

**XIV MAINTENANCE OF HOMEOSTASIS**
• Plasma buffers
• Renal mechanisms in pH regulation
• Anion gap
• Metabolic acidosis,

**XV NUCLEIC ACIDS**
• DNA and RNA
• Purine and pyrimidine bases,

**XVI CANCER**
• Chemical and physical carcinogens
• Tumor markers.

********************************************************************

**Paper II – Section B: PHARMACOLOGY**

**Course outcome:**
1. CO1: Basic knowledge in pharmacology.
2. CO2: Detailed systemic pharmacology.
3. CO3: Detailed knowledge of drugs and groups of drugs.

**Course**
• General Pharmacology – 4 hours
• Evaluation of drugs in man, drug prescribing and drug interactions – 3 hours
• Sedatives, hypnotics and pharmacotherapy of insomnia – 1 hour
• Drugs effective in convulsive disorders – 1 hour
• Opioid analgesics – 1 hour
• Analgesic – antipyretics and non-steroidal anti-inflammatory drugs – 1 hour
• Psychopharmacology – 1 hour
• Drug therapy of parkinsonsonism and other degenerative disorders of the brain – 1 hour
• Local anesthetics – 1 hour
• Adrenergic and adrenergic blocking drugs – 1 hour
• Histamine and anti histamic drugs – 1 hour
• Pharmacotherapy of cough – 1 hour
• Pharmacotherapy of bronchial asthma and rhinitis – 1 hour
• Digitalis and pharmacotherapy of cardiac failure – 1 hour
• Vasodilator drugs and pharmacotherapy of angina pectoris – 1 hour
• Pharmacotherapy of hypertension – 1 hour
- Drugs and blood coagulation – 1 hour
- Drugs effective in iron deficiency and other related anemias – 1 hour
- Diuretics – 1 hour
- Emetics, drug therapy of vomiting, vertigo and diarrhea – 1 hour
- Pharmacotherapy of constipation – 1 hour
- Pharmacotherapy of peptic ulcer – 1 hour
- Sulfonamides, Trimethoprim, cortimoxazole, nitrofurans and quinolones – 1 hour
- Penicillins and antibiotics effective mainly against gram positive organisms – 1 hour
- Amonoglycosides and other antibiotics effective mainly against gram negative organisms – 1 hour
- Antibiotics effective against both gram positive and gram negative organisms – 1 hour
- General principles of chemotherapy of infections – 1 hour
- Chemotherapy of urinary tract infections – 1 hour
- Antiseptics, disinfectants and insecticides – 1 hour
- Thyroid and antithyroid drugs – 1 hour
- Insulin and ant diabetic drugs – 1 hour
- Adrenal cortical steroids – 1 hour
- Vitamins and antioxidants – 1 hour
- Drugs, pregnancy and the newborn – 1 hour

********************************************************************
Paper III – AHS 13
Section A: MICROBIOLOGY

Course Outcome:
1. CO1: To understand the morphological characters of bacteria.
2. CO2: To master the preparation of smear, fixation and staining of bacterial smears and its quality control methods
3. CO3: Learn to use microscope, autoclave, hot air oven, water bath, steamer, filters
4. CO4: To differentiate between innate and adaptive immunity, and explain the main defences lines as well as biological barrier to the infections.
5. CO5: Employ antigen –antibody interaction to conduct different immunological and serological tests in the laboratory

Introduction to medical microbiology - 1 hr
Morphology and physiology of bacteria - 1 hr
Sterilization and disinfection - 2 hrs
Normal Microbial flora of the human body - 1 hr
Infection - 2 hrs
Antibiotics - 1 hr
Hospital infections and prevention - 2 hrs
Immunity - 1 hr
Antigen, Antibody, Antigen-antibody reactions - 1 hr
Immune response - 1 hr
Hypersensitivity - 1 hr
Immunoprophylaxis - 1 hr
Tuberculosis - 1 hr
Typhoid - 1 hr
Virus infections - 1 hr
HIV/AIDS - 1 hr
Hepatitis viruses - 1 hr
Medical Mycology - 1 hr
Medical Parasitology - 1 hr
Malaria - 1 hr
Urinary Tract Infections - 1 hr
Respiratory Tract Infections - 1 hr
Gastrointestinal Infections - 1 hr
Sexually Transmitted Disease - 1 hr
Infections of the nervous system - 1 hr

Practical Demonstrations
Gram Staining - ½ hr
Acid Fast Staining - ½ hr
Antibiotic Susceptibility Testing - ½ hr
CSSD Visit - ½ hr
Theory Class Hours - 28 hrs
Practical Demonstration hours - 2 hrs
Total hours - 30 hrs

Reference books:
Text Book of Medical Paracytology
C.K.Jayaram Panicker

Text Book of Microbiology
Anand Narayan

********************************************************************

Paper III – Section B: PATHOLOGY

Course Outcome:
1. CO1: Knowledge of general and systemic pathology.
2. CO2: Knowledge of pathology of neoplasms.
3. CO3: Knowledge of basics of community health.

1. Introduction to Pathology 3 hrs
   - Histopathology- Methods and techniques
   - Cytology-FNAC, Exfoliative advantages and limitations of cytology
   - Hematology-Sample collection.
- Immunohistochemistry, Immunofluorescence, Electron microscopy, Flow cytometry

2. Cell injury & adaptations 1 hr
   - Etiology
   - Reversible & Irreversible cell injury
   - Necrosis & Apoptosis
   - Gangrene - Dry - Wet
   - Atrophy, Hypertrophy, Hyperplasia, Metaplasia, Dysplasia.
     Fatty change

3. Inflammation & Repair 2 hrs
   - What is inflammation
   - Signs of inflammation, Acute and chronic inflammation, Types of inflammation, Giant cells, Macrophages, Ulcer, abscess, Acute inflammation, Systemic effects of acute inflammation
   - Factors affecting healing - Complications of healing

4. Hemodynamic Disorders 2 hrs
   - Definition of edema and causes of edema
   - Exudate and transudate
     Shock – Definition and types of shock
     Thrombosis
     Embolism - Definition and types of emboli, - Pulmonary thromboembolism

5. Neoplasia 2 hrs
   - Definition
   - Difference between benign and malignant cells, Nomenclature of tumors
   - Routes of metastasis of tumours, - Staging of tumour, - Etiology of cancers - Diagnosis of cancer, including tumour markers

6. CVS 1 hr
   - Definition of Ischaemia, Infarction, Aneurysm
   - Rheumatic heart disease, Infective endocarditis, Atherosclerosis
   - Myocardial infarction, Hypertension and pericardial effusion

7. Respiratory system 1 hr
8. GIT  
- Tuberculosis, Pleural effusion, Pneumonia, COPD and tumours
- Peptic ulcer, Carcinoma of oesophagus, Stomach & Colon,
- Inflammatory bowel disease (UC & Crohns)

9. Liver and GB  
- Hepatitis. Cirrhosis, Tumours of liver
  - Cholecystitis and GB calculi

10. Renal  
- Glomerulonephritis & Pyelonephritis
- Renal calculi
  - Nephrotic syndrome, Renal tumors, Polycystic renal diseases

Internal assessment  Exam -1 ½ hrs

11. MGS  
- Cryptorchidism, Orchitis, epididymitis, Prostatic hyperplasia
  - Carcinoma penis, Testicular tumors

12. FGS & Breast  
Ovarian tumours,- Fibroid- Carcinoma cervix- Carcinoma endometrium pap smear
Fibroadenoma breast, Carcinoma Breast-Predisposing factors & TNM

13. CNS  
- Meningitis & encephalitis.- Alzheimer’s disease,
  Tumours - Meningioma, Gliomas, Metastasis
  CSF collection, indication and contraindication, tests performed, cytocentrifuge

14. Skin & soft tissue  
Skin- SCC, Melanoma,BCC inflammatory lesions lipoma,

15. Bone  
Osteoporosis, Osteomyelitis,Rickets ,Osteomalacia
  Tumours – Osteosarcoma, Osteoclastoma , Ewings sarcoma & Arthritis
16. Endocrine

Organs, Pituitary, Adrenal brief; Thyroid – Goitre thyroiditis and tumours
Diabetes and its complications

17. Anaemias
- Types of anaemia

18. WBC disorders
Non neoplastic and neoplastic

19. Lymphoreticular system
- Lymphadenitis, Lymphomas

20. Platelet and coagulation abnormalities
- Primary & Secondary Hemostasis

21. Clinical Pathology I
Blood collection, anticoagulants used, vacuette and their color code. Complete hemogram and the various parameters, Bone marrow – Indication of BM study & collection procedure, PT, APTT sample collection

22. Clinical Pathology II
- Urine analysis – Physical, Chemical, microscopic, Dipstick parameters

23. Transfusion Medicine
- Blood grouping, cross matching, Screening of donor, Precautions to take when you start blood transfusion, Monitoring during transfusion, Transfusion reactions, Blood components

Internal assessment
Exam - 1 1/2 hrs

Lab visit:
- Histopathology lab - 1 hr
- Hematology lab & blood bank - 1 hr
- Cytology lab - 1 hr

Total Hours: 29 hrs lecture + 3 hrs exam + 3 hrs lab visit = 35 hrs

Reference Books:

Basic Pathology: An introduction to the mechanisms of disease
Sunil R Lakhani, Susan A Dilly, Caroline J Filayson

********************************************************************
Course outcome:
1. CO1: basic understanding of use of computer.
2. CO2: Applications of computer in clinical departments.
3. CO3: Detailed knowledge on how to use hospital information system.

Course Description: This course is designed for students to develop basic understanding of use of computer and its applications in Clinical Departments

**Paper IV – Section B: QUALITY ASSURANCE AND ACCREDITATION**

**Course outcome:**
1. CO4: Introduction and basic concept of quality.
2. CO5: Standardization and Implementation

**Course Objectives:**
Modernization and its brand conscious make an organization thrive towards perfection in the comparative world of business. The underlying factor that allows an organization to stand the test of time is quality. The students are given the working knowledge of the subject.

**Course Content:**
- Introduction to quality - 2 hrs
- Definition, Concept, Benefits - 2 hrs
- Function - 2 hrs
- Design - 2 hrs
- Formulation - 2 hrs
- Standardization - 2 hrs
- Implementation - 2 hrs
- Factors affecting quality - 2 hrs
- Need for quality - 2 hrs
- Quality cycle - 2 hrs
- Quality objectives - 2 hrs
- Quality policy - 2 hrs
- Quality measurable - 2 hrs
- Quality Control, Quality Standards, Q C Tools - 6 hrs
- Quality Documents, QC Records, Kazen techniques - 2 hrs

Paper V (AHS 15): ENGLISH

Course Description: The course is designed to enable students to enhance ability to comprehend spoken and written English (and use English) required for effective communication in their professional work. Students will practice their skills in verbal and written.

Course Outcome
1. CO1: Develop their intellectual, personal and professional abilities.
2. CO2: Acquire basic language skills (listening, speaking, reading and writing) in order to communication with speakers of English language
3. CO3: Acquire the linguistic competence necessarily required in various life situations

**************************************************************************
SECOND YEAR

During the second year the students will be posted in the clinical area from 9 AM to 5 PM includes didactic lecture from 2 PM to 3 PM.

Internal Assessment

Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks along with performance in the clinical posting.

********************************************************************

Paper VI: BASIC SCIENCES & BASICS OF DIABETES

Course outcome:
1. CO1: Thorough knowledge of different types of Diabetes and its complications
2. CO2: Gets awareness of importance of prevention of diabetes complications
3. CO2: Gets clear awareness of the symptoms of the disease

BASIC SCIENCES

Role of educator (1 hrs)
To understand that educators are a part of a team, which includes the person with diabetes at its centre, and that their role is to work with other team members to improve people’s self-care ability, health and quality of life.

Team management (2 hrs)
To understand how the needs of people with diabetes can be met with an interdisciplinary care approach and the roles of the health professionals involved in providing diabetes care. To emphasize the blended and overlapping nature of roles in a fully integrated team.

Teaching and learning (6 hrs)
To provide knowledge and skills of the education process to enable them to be effective diabetes educators and to develop excellent communication skills. An overview on the importance of assessing readability of handout materials for people with diabetes.

Psychosocial and behavioral approaches (3 hrs)
To highlight the impact of diabetes, and the psychosocial needs of people with diabetes and their family. To provide knowledge and skills to enhance the psychological well-being and diabetes self-management of people with the condition using a patient-centered approach. To encompass behavioral approaches, and emotional support in self-management education.
Research (12 hrs)
To understand research principles, skills to read and critically analyze scientific literature, importance of using research evidence in clinical practice. Data entry & audit (SPSS/Excel). Simple statistics

BASICS OF DIABETES

UNIT I
Introduction to diabetes
Definition & Meaning
Types of diabetes
Statistics: International, National, State level, District level

UNIT II
History of Diabetes Anatomy & Physiology of pancreas
Microscopic anatomy of pancreas
Genetics
Secretion of Insulin, Glucogen & Somatostatin
Functions & Utilization of insulin, glucogen & somatostatin
Normal metabolism of carbohydrates, fats, proteins
Types of carbohydrates, fats, proteins, Biochemistry of carbohydrates, fats, proteins,
Energy conversion, Storage in the body, End products

UNIT III
Pathological changes in pancreas, beta cells, alpha cells
Pathological changes in metabolism
Path physiology of diabetes

UNIT IV
Pathological Changes in Other System
Eye, CVS, Neuropathy, Nephropathy & Micro vascular

UNIT V
Diagnosis and routine investigation Timely reviewsTypes & classification of DM

******************************************************************************

Paper VII: PATHOPHYSIOLOGY & LONG TERM COMPLICATIONS OF DIABETES

Course Outcome:
1. CO1: They will get an idea of the importance of the role of Diabetes Educator
2. CO2: They will get an idea of the importance of team work for Diabetes management
3. Co3: They will get a thorough knowledge on normal metabolism of Carbohydrates, Proteins and fats
4. CO4: They will get an introduction about different types of carbohydrates, fats, proteins and biochemistry of the same

**Introduction:**
**Epidemiology:** Definition, scope and uses of epidemiology, measuring disease frequency (prevalence, incidence rate), Epidemiology and prevention of chronic diseases, different levels of prevention (primodial, primary, secondary and tertiary) Types of studies and study design (qualitative and quantitative designs), Biostatistics – basic concepts (Mean, Median and Mode, Normal distribution)

**Public Health Problems:** Identifying individuals at high risk for type 2 Diabetes, Evidence for type 2 Diabetes prevention. The Community and health care facility.

**Quality of care:** Health outcome include treatment of glycemic control, lipid levels, blood pressure, frequency of self-monitoring of blood glucose. Patients centered outcomes includes patient satisfaction, well being and quality of life.

**Pathophysiology of Diabetes:** Types and causes, Disease process, Diagnostic criteria, Screening for Diabetes – why, when and how? (Urine sugar and blood sugar), Continuum of care (primary, secondary, tertiary, prevention)

**Long term complications:**
**Macro vascular complication:** It includes coronary artery disease, cerebral vascular and peripheral vascular disease – type, risk factors and intervention strategies.
**Micro vascular complication:** Diabetes Eye disease, Neuropathy, Nephropathy – Disease stage, diagnosis and treatment. Other complications (foot, skin, gastrointestinal disorders, endocrine disease, psychological factors, etc.)

**************************************************
**THIRD YEAR**
During the third year the students will be posted in the clinical area from 8 AM to 5 PM with one hour didactic lectures.

**Internal Assessment**
Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks along with performance in the clinical posting.

**************************************************
**Paper VIII: MEDICAL NUTRITION THERAPY BDDBS31**

**Course Outcome:**
1. CO1: They will get thorough knowledge on digestion, absorption transport storage and excretion of nutrients
2. CO2: They will get a knowledge on the significance of dietary management for diabetic patients
3. CO3: They will be able to take dietary assessment of the diabetic patients
4. CO4: They will be able to give dietary counselling for Diabetic patients
5. CO5: They can develop an individualised meal plan

**Basics of Nutrition (10hrs)**
- Digestion, absorption, transport, storage and excretion of nutrients
- Energy, carbohydrates, fat and protein, vitamins and minerals
- Physiologic fuel value
- Requirements
- Methods of assessment
- Factors affecting in physiologic stages
- Nutritional significance
- Metabolic functions
- Recommended allowances
- Sources
- Effects of deficiency
- Food Additives
- Reading Food label
- Healthy cooking

1. **Medical Nutrition therapy (10hrs)**
   - Nutrition therapy for Type 1 and Insulin-Requiring Type 2 Diabetes
   - Nutrition therapy for Adults with Type 2 Diabetes
   - Nutrition therapy for Youth with Diabetes
   - Nutrition therapy for Older Adults with Diabetes
   - Nutrition therapy for Gestational Diabetes
   - Nutrition therapy for the Hospitalized and Long-Term Care patient with Diabetes
   - Crash diets and diet fads
     - Low Carbohydrate – High Fat diet
     - High Protein Diet – ‘Atkin’s Diet’
     - GM Diet
     - Vaganism and Vegetarianism

2. **Dietary assessment (5hrs)**
   - Anthropometrics
   - Biochemical tests
   - Clinical observations
   - Dietary and personal history

**Prescribing model menu (3hrs)**
**Dietary counseling (2hrs)**

**Paper IX: MANAGEMENT OF DIABETES AND DIABETIC EDUCATION**

**BDDBS32**

**Course outcome:**
1. Co1: Students will be able to initiate Insulin administration (both subcutaneous & intravenous insulin infusion)
2. Co2: They will get thorough knowledge about different types of Insulin, insulin delivery devices, and other OAD-s
3. Co3: They will be able to give an advise to avoid and manage Hypo & Hyper glycemia, self management strategies during special situations.
4. Co4: Importance of educational and behavioural interventions in the management of diabetes
5. Co5: They gets practical knowledge on CGMS & Insulin pump therapy
6. Co6: Will get an introduction about Research projects on Diabetes
7. Co7: Will be able to conduct a multidisciplinary team for the Diabetes awareness in the public

Management of Diabetes – overview: Aims of treatment, the importance of overall metabolic control, internationally recognized standards of care. The evidence for good control, physical assessment and laboratory assessment.

Practical management of Diabetes: Dietary management, insulin and oral therapy, Avoiding and managing hypo and hyperglycemia, Self _ management strategies during special situations (sick days, travel, hypoglycemic events, etc), Self monitoring (glycemic control & complications related to diabetes), Lifestyle issues, Newer trends in management.

Special considerations: Diabetes in children and adolescents, Diabetes in pregnancy, Diabetes in the elderly, Diabetes & infection, Diabetes in people living in poverty, surgical considerations in Diabetes.

Educational approaches for special situations: Low literacy, Low income. Mentally or physically challenged individuals, Amputation.

Diabetes Foot Care & Education
Edema, Ulceration, Gangerne, Identifying foot at risk.

Diabetes & Dental Care:
Definition, preventive measures for dental problems, important aspects of oral hygiene, nutritional modification and appropriate instruction for treating periodontal disease.

Hypoglycemia & Hyperglycemia:
Causes, Symptoms, Prevention & Treatment.

Developing an Individualized meal plan:
Diet order, Menu setting, Supervising the diets.

Standardization of recipe:
To plan, calculate, calculate the nutritive value and demonstrate.

Diabetes Exercise Plan
Designing an exercise regimen for diabetics taking into consideration factors such as age, weight, mobility, co-morbidities like hypertension, cardiac conditions, etc. Exercises like Yoga and other meditation techniques – role and utility.

**Managing a diabetes service:**
The multidisciplinary team, Organizing the Diabetes clinic, Documenting and monitoring the quality of care, Assessing and reporting outcomes. Research Projects on Diabetes.

-------------------------------------------------------------------------------

**Paper X: BASICS OF PODIATRY BDDBS33**

**Course outcome:**

1. CO1: They will get knowledge on how diabetes affect foot
2. CO2: Ability to perform various investigations.
3. CO3: They will get an idea of different types of dressing materials and topical applications used for Diabetes foot ulcer management
4. CO4: They will get idea of the different types of micro organisms as well as its sensitivity to antibiotics
5. CO5: They can give foot wear and foot care advise for Diabetic foot patients

**Course**

1. Anatomy of foot
2. Biomechanics and GAIT
3. Foot Examination
4. Diabetes foot scan
5. AB Index,
6. Biothesiometer,
7. TcPO2,
8. Pedopodogram,
9. Anodyne therapy
10. Description of ulcer
11. Wound healing
12. Dressing materials and topical applications
13. Neuropathy- Clinical
14. Pathogenesis
15. Treatment
16. POVD
17. Atherosclerosis
18. Diabetic Vasculopathy
19. Aetiopathogenesis
20. Treatment
21. Diabetic foot infection (Microbiology)
22. Diabetic foot Infection (Treatment)
23. Infection of leg and foot
24 Ingrowing toe nail and fungal in of nail and foot
25 Antibiotic and MDR
26 Surgical treatment (Principals)
27 Charcot
28 TCC Tech and Principals
29 Diabetic footwear

Practicals
- Insulin Delivery devices
- Glucose Monitoring
- Foot assessment
- Dietary prescription
- VIVA
- Foot assessment
- ABI, Biothesiometer,
- Pedopodogram
- Callus scraping
- Plaster application
- Dressing
- Small debridement

PATTERN OF QUESTION PAPERS

3. Paper I to Paper IV

The duration of each theory paper will be three hours; the paper will have two sections (Section A & Section B) each carrying 50 marks and a total of 100 marks.

Pattern of Question Paper

Structured Essay (2 out of 2) - 20 marks (2 x 10 marks)
Short Notes (3 out of 4) - 15 marks (3 x 5 marks)
Short answer question (5 out of 7) - 15 marks (5 x 3 marks)

Total Marks - 50 marks

4. Paper V

The duration of Paper V will be two hours; the paper will have only one section for a total of 50 marks.

Pattern of Question Paper

English Grammar - 20 marks
English Writing - 30 marks

Total Marks - 50 marks

5. Paper VI to Paper X

The duration of each theory paper will be three hours; the paper will have only one section of 100 marks.

Pattern of Question Paper

Structured Essay (4 out of 4) - 40 marks (4 x 10 marks)
Short Notes (6 out of 8) - 30 marks (6 x 5 marks)
Short answer question (10 out of 12) - 30 marks (10 x 3 marks)

Total Marks - 100 marks
