PROGRAM
BSc Emergency Medical Technology
(Revised with effect from 2014-2015 onwards)

A Super Speciality Tertiary Care Hospital Accredited by ISO 9001-2008, NABL & NABH
SPIRITUAL PRINCIPLES IN EDUCATION

"In the gurukulas of ancient rishis, when the master spoke it was love that spoke; and at the receiving end disciple absorbed of nothing but love. Because of their love for their Master, the disciples’ hearts were like a fertile field, ready to receive the knowledge imparted by the Master. Love given and love received. Love made them open to each other. True giving and receiving take place where love is present. Real listening and ‘sraddha’ is possible only where there is love, otherwise the listener will be closed. If you are closed you will be easily dominated by anger and resentment, and nothing can enter into you”.

“Satguru Mata Amritanandamayi Devi”
Amrita Institute of Medical Sciences

Since its inception, Amrita Institute of Medical Sciences (AIMS) in fifteen short years has grown from a 115 bed specialty hospital to a 1250 bed super-specialty tertiary care health centre with an attached medical school and hospital. On the 17th of May 1998, AIMS was inaugurated by the Prime Minister of India, Shri Atal Bihari Vajpayee, in the presence of Her Holiness, Sri Mata Amritanandamayi Devi. The Amrita Institute of Medical Sciences is the adjunct to the term “new universalism” coined by the World Health Organisation. This massive healthcare infrastructure with over 9,00,000 sq. ft of built-up area spread over 100 acres of land supports a daily patient volume of approx 3000 outpatients and an average of 135 admissions. Annual patient turnover touches an incredible figure of over 9,00,000 outpatients and nearly 41,000 inpatients.

With extensive facilities comprising 25 modern operating theatres, 200 equipped intensive-care beds, a fully computerised and networked Hospital Information System (HIS), a fully digital radiology department, a 24/7 telemedicine service and a comprehensive well-equipped clinical laboratory, AIMS offers a total and comprehensive health solution comparable to the best hospitals in the world. AIMS features one of the most advanced hospital computer networks in India. The network supports more than hundreds computers and has computerised nearly every aspect of patient care including all patient information, lab testing and radiological imaging. The AIMS team comprises physicians, surgeons and other healthcare professionals of the highest calibre and experience. Our Hospital services are accredited by ISO 9001-2008 and National Accreditation Board for Hospitals & Healthcare Providers (NABH) and lab services by National Accreditation Board for Testing and Calibration Laboratories.

The educational institutions of Amrita Institute of Medical Sciences, which include the Amrita School of Medicine, the Amrita School of Dentistry, the Amrita College of Nursing, the Amrita School of Pharmacy and Amrita Centre for Allied Health Sciences are committed to being centres of excellence providing value-based medical education, where the highest human qualities of compassion, dedication, purity and service are instilled in the youth. Amrita Institute of Medical Sciences strives to help all students attain the competence and character to humbly serve humanity in accordance with the highest principles and standards of the healthcare profession.

Based on evaluation of all our University campuses and programs by a peer review committee, the university has been accredited by the National Assessment and Accreditation Council (NAAC) with an ‘A’ grade. Amrita has also been ranked in the Ivy League of Indian Universities along with Indian Institute of Science, Bangalore, Tata Institute of Fundamental Research (TIFR), Mumbai etc. in a review of deemed universities by the Ministry of Human Resource Development (MHRD) of the Government of India. In a recent review of Deemed Universities by a high-power committee of reputed academicians, popularly known as the Tandon Committee, set up by the Ministry of Human Resources Development, Amrita Vishwa Vidyapeetham was placed in Category 1. In Tamil Nadu, besides Amrita, only the Chennai Mathematical Institute, a Deemed University, was given this recognition.

2. **Medium of Instruction**

   English shall be the medium of instruction for all subjects of study and for examinations.

3. **Eligibility**

   Generally Science Graduates with Physics, Chemistry, Biology are eligible as detailed under for admission to the Under Graduate Courses except in respect of certain specialties for which other qualification or subjects are specifically called for. Essential qualifications for eligibility are mentioned under clause No. I.

II. **General Rules**

   Admissions to the courses will be governed by the conditions laid down by the University from time to time and as published in the Regulations for admissions each year.

1. **Duration of the Course**

   Duration details are mentioned under clause No.I of this booklet.

   Duration of the course: 4 Years (3 years + 1 year Internship)
   Weeks available per year: 52 weeks
   Vacation / holidays: 5 weeks (2 weeks vacation + 3 weeks calendar holidays)
   Examination (including preparatory): 6 weeks
   Extra curricular activities: 2 weeks
   Weeks available: 39 weeks
   Hours per week: 40 hours
   Hours available per academic year: 1560 (39 weeks x 40 hours)

   Internship wherever specified are integral part of the course and needs to be done in Amrita Institute of Medical Sciences, Centre for Allied Health Sciences, Kochi itself.

2. **Discontinuation of studies**

   Rules for discontinuation of studies during the course period will be those decided by the Chairman /Admissions, Centre for Allied Health Sciences, and Published in the "Terms and Conditions" every year.

3. **Educational Methodology**

   Learning occurs by attending didactic lectures, as part of regular work, from coworkers and senior faculty, through training offered in the workplace, through reading or other forms of self-study, using materials available through work, using
materials obtained through a professional association or union, using materials obtained on students own initiative, during working hours at no cost to the student.

III. Examination Regulations :

1. Attendance :

80% of attendance (physical presence) is mandatory. Medical leave or other types of sanctioned leaves will not be counted as physical presence. For those who possess a minimum of 75% attendance, deficiency up to 5% may be condoned on medical or other genuine grounds by the Principal at his sole discretion and as per the recommendation of the Heads of Departments concerned. Students are allowed such condonation only once for entire course of study. Condonation fee as decided by the Principal has to be paid. Attendance will be counted from the date of commencement of the session to the last day of the final examination in each subject.

2. Internal Assessment :

1. Regular periodic assessment shall be conducted throughout the course. At least two sessional examinations in theory and preferably two practical examinations should be conducted in each subject. The model examination should be of the same pattern of the University Examination. Average of the two examinations and the marks obtained in assignments / oral / viva / practicals also shall be taken to calculate the internal assessment.

2. A candidate should secure a minimum of 35% marks in the internal assessment in each subject (separately in theory and practical) to be eligible to appear for the University examination.

3. The internal assessment will be done by the department twice during the course period in a gap of not more than six months and final model exam which will be the same pattern of university examination as third sessional examination. The period for sessional examinations of academic year are as follows:

   - First Sessional Exam : October
   - Second Sessional Exam : January
   - Model Exam : May /June

4. Each student should maintain a logbook and record the procedures they do and the work patterns they are undergoing. It shall be based on periodical assessment, evaluation of student assignment, preparation for seminar, clinical case presentation, assessment of candidate’s performance in the sessional examinations, routine clinical works, logbook and record keeping etc.
5. Day to day assessment will be given importance during internal assessment, Weightage for Internal assessment shall be 20% of the total marks in each subject.

6. Sessional examination as mentioned above and the marks will be conducted and secured by the students along with their attendance details shall be forwarded to the Principal (Result of the first sessional examination should reach before December 1st week of the academic year and result of the second sessional examination should reach to the Principal before March 1st week of the academic year)

7. Third sessional examinations (model exam) shall be held three to four weeks prior to the University Examination and the report shall be made available to the Principal ten days prior to the commencement of the university examination.

3. University Examinations:

- University Examination shall be conducted at the end of every academic year.
- A candidate who satisfies the requirement of attendance, internal assessment marks, as stipulated by the University shall be eligible to appear for the University Examination.
- One academic year will be twelve months including the days of the University Examination. Year will be counted from the date of commencement of classes which will include the inauguration day.
- The minimum pass for internal assessment is 35% and for the University Examination is 45%. However the student should score a total of 50% (adding the internal and external examination) to pass in each subject (separately for theory and practical)
- If a candidate fails in either theory or practical paper, he/she has to reappear for both the papers (theory and practical)
- Maximum number of attempts permitted for each paper is five (5) including the first attempt.
- The maximum period to complete the course shall not exceed 6 years.
- All practical examinations will be conducted in the respective clinical areas.
- Number of candidates for practical examination should be maximum 12 to 15 per day
- One internal and external examiner should jointly conduct the theory evaluation and practical examination for each student during the final year.
4. Eligibility to appear university Examination :

A student who has secured 35% marks for Internal Assessment is qualified to appear for University Examination provided he/she satisfies percentage of attendance requirement as already mentioned at the III (1) of the clause.

5. Valuation of Theory – Revaluation Papers :

1. Valuation work will be undertaken by the examiners in the premises of the Examination Control Division in the Health Sciences Campus.
2. There will be Re-Valuation for all the University examinations. Fees for revaluation will be decided by the Principal from time to time.
3. Application for revaluation should be submitted within 5 days from date of result of examination declared and it should be submitted to the office with payment of fees as decided by the Principal.

6. Supplementary Examinations :

Every main University examination will be followed by a supplementary examination which will normally be held within four to six months from the date of completion of the main examination.

As stipulated under clause No. 2 under Internal Assessment, HOD will hold an internal examination three to four weeks prior to the date of the University Examination. Marks secured in the said examination or the ones secured in the internal examination held prior to the earlier University Examination whichever is more only will be taken for the purpose of internal assessment. HODs will send such details to the Principal ten days prior to the date of commencement of University examination.

Students who have not passed / cleared all or any subjects in the first University examination will be permitted to attend the second year classes and also eligible to appear for second year university examination along with first year supplementary examination. However, he / she can appear for the third (final) year university examination, only if he / she clears all the subjects in the first as well as in the second year examinations.

Same attendance and internal marks of the main examination will be considered for the supplementary examination, unless the HOD furnish fresh internal marks and attendance after conducting fresh examination.

Students of supplementary batches are expected to prepare themselves for the University Examinations. No extra coaching is expected to be provided by the Institution. In case at any time the Institution has to provide extra coaching, students will be required to pay fees as fixed by the Principal for the said coaching.
7. Rules regarding carryover subjects:

A candidate will be permitted to continue the second and third year respectively of the course even if he/she has failed in the first or second year university examinations.

A candidate must have passed in all subjects to become eligible to undergo compulsory internship of one year, for the candidates who have not passed all the subjects the duration of the third year shall be extended until they become eligible to undergo compulsory internship.

IV. Criteria for Pass in University Examination - Regulations:

1. Eligibility criteria for pass in University Examination:

   In each of the subjects, a candidate must obtain 50% in aggregate for a pass and the details are as follows:
   - A separate minimum of 35% for Internal Assessment
   - 45% in Theory & 35% in Oral / Viva
   - A separate minimum of 50% in aggregate for Practicals / Clinics (University Examinations)
   - Overall 50% is the minimum pass in subject aggregate (University Theory + Viva / Oral + Practicals + Internal Assessment)

2. Evaluation and Grade:

   1. Minimum mark for pass shall be 50% in each of the theory and practical papers separately (including internal assessment) in all subjects except English. Only a minimum of 40% is required to pass in English.
   2. A candidate who passes the examination in all subjects with an aggregate of 50% marks and above and less than 65% shall be declared to have passed the examination in the second class.
   3. A candidate who passes the examination in all subjects in the first attempt obtaining not less than 65% of the aggregate marks for all the three years shall be declared to have passed the examination with First Class.
   4. A candidate who secures an aggregate of 75% or above marks is awarded distinction. A candidate who secures not less than 75% marks in any subject will be deemed to have passed the subject with distinction in that subject provided he / she passes the whole examination in the first attempt.
   5. A candidate who takes more than one attempt in any subject and pass subsequently shall be ranked only in pass class.
   6. A Candidate passing the entire course is placed in Second class / First class / Distinction based on the cumulative percentage of the aggregate marks of all the subjects in the I, II and III (Final) university examinations.
   7. Rank in the examination : - Aggregate marks of all three year regular examinations will be considered for awarding rank for the B.Sc Graduate Ex-
amination. For the courses where the number of students are more than 15 rank will be calculated as under:

- Topmost score will be declared as First Rank
- Second to the topmost will be declared as Second Rank
- Third to the topmost will be declared as Third Rank

V. Internship:

1. Eligibility for Internship - Regulations:

   Wherever internship is a part of the curriculum, students will have to do the internship in Amrita Institute of Medical Sciences itself. A candidate must have passed in all subjects to become eligible to undergo compulsory internship of one year. For the candidates who have not passed all the subjects the duration of the third year shall be extended until they become eligible to undergo compulsory internship.

   "Internship has to be done continuously for a period provided in the syllabus except in extra ordinary circumstances where subject to the approval of the Principal the same may be done in not more than two parts with an interruption not exceeding six months. In any case Internship shall be completed within 18 months from the date of acquiring eligibility to the internship.

2. Attendance and leave details during Internship:

   For 30 days of duty an intern will be eligible for casual leave and one weekly off. For all Under Graduate courses, the period of internship will be one year and so an intern is eligible for one casual leave and one weekly off in a month and total 12 days casual leave is permitted during internship for a student. For example if a student has taken more than 15 days leave in an emergency situation, then he/she is permitted 12 days as casual leave and the remaining 3 days she / he has to compensate by doing duty for 3 days.

   A Student will become eligible to receive his/her degree only after completion of internship to the complete satisfaction of the Principal.

VI. General considerations and teaching / learning approach:

   There must be enough experience to be provided for self learning. The methods and techniques that would ensure this must become a part of teaching-learning process.

   Proper records of the work should be maintained which will form the basis for the students assessment and should be available to any agency who is required to do statutory inspection of the school of the course.
Part II
Syllabus
INTRODUCTION AND ADVANCEMENT

The concept of emergency medicine is relatively new to the Indian medical world while it has become the backbone of the healthcare system in most developed countries. Emergency medicine is a field of practice based on the knowledge and skills required for the prevention, diagnosis and management of the acute and urgent aspects of illness and injury affecting patients of all age groups with a full spectrum of undifferentiated physical and behavioral disorders. It is a specialty in which time is critical. Emergency Medical team take care of patient presenting with acute emergencies. All the initial resuscitation will be done by the Emergency Medical team comprising of Emergency physician, Technician and other paramedical staff. This course offers mainly towards the initial resuscitation of patient who arrive in the Emergency room. As the number of trauma and natural disasters are increasing day by day, Emergency Medicine has become the need of the hour.

MAIN OBJECTIVE OF THE PROGRAMME

- To identify an emergency
- To know how to manage a cardiac arrest and a polytrauma victim
- Transportation of critically ill patient
- Basics regarding airway and circulatory management
- To make students self-sufficient in immediate management of a critically ill
- Hands on training in emergency procedures

Scope and Career Options

- To assist the Emergency Physician in the Emergency room/ICU
- As an Emergency Medical technician while transferring the patient (in road or in air ambulance)
- Have excellent job opportunities overseas
- As instructor for ACLS (advanced cardiac life support) and ATLS (Advanced trauma life support)

Program Outcomes (PO)

1. **PO1**: Fundamental knowledge on the subject
2. **PO2**: Effective communication skills.
3. **PO3**: Knowledge in professional ethics
4. **PO4**: Leadership qualities and team work
5. **PO5**: Problem Analysis and solving skills
6. **PO6**: Basic knowledge on research methodology
7. **PO7**: Higher Technical skills and competences
8. **PO8**: Higher study options in many fields
9. **PO9**: Employability in various sectors
10. **PO10**: Better employment opportunities

**Program Specific Outcomes (PSO)**
1. **PSO1**: To identify an emergency
2. **PSO2**: To know how to manage a cardiac arrest and a polytrauma victim
3. **PSO3**: Transportation of critically ill patient
4. **PSO4**: Basics regarding airway and circulatory management
5. **PSO5**: To make students self sufficient in immediate management of a critically ill.
6. **PSO6**: Communicate effectively with patients and their relatives.

**Elective Course**

**BEMT40**

**Value Based Education**
- CO1: The attitude to be a good human being, with the curiosity to continue lifelong learning.
- CO2: The conviction to do service to humanity - to put the interests of the individual patient as the foremost priority. Acquisition of values of gender sensitivity, environment & sustainability.
- CO3: Acquisition of the “skills for life” in addition to the skills to live.
- CO4: Acquisition of positive lifelong values including ethics and etiquette.
- CO5: The “practical applications” of the right values

**COURSE STRUCTURE**

**First year**

Theory classes and practicals of following subjects

- Anatomy
- Physiology
- Biochemistry
- Pharmacology
- Microbiology
- Pathology
- Introduction to Computer application
- Quality Assurance & Accreditation
- English

**Second year**
Theory class and posting in the clinical area

Emergency Medicine

Third year

Theory class and posting in the clinical area

Emergency Medicine, ICU and Emergency Medical transport

Fourth Year

Fourth year is internship in the clinical area

FIRST YEAR

During the first year the students will have didactic lecture in the medical college from 10 am to 4 pm

Internal Assessment

Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks.

********************************************************************************

Paper I – AHS11
Section A: ANATOMY

COURSE OBJECTIVE:
An outline of anatomy with special emphasis on applied aspects is provided to the students for better understanding of the technical and diagnostic procedure.

Course Outcome:
1. CO1: Knowledge of general anatomy and locomotion.
2. CO2: Knowledge of basic human anatomy and histology of CVS and Respiratory systems.
3. CO3: Knowledge of basic human anatomy and histology of CNS, GI, excretory and reproductive systems.
4. CO4: Knowledge of basic human anatomy and histology of endocrine system and special senses.

1. The human body as a whole

   Definition
   Sub divisions of anatomy
   Terms of location and positions

   1 hour
2. **Locomotion and Support**  
8 hours

**The Skeletal System**
- Types of bones
- Structure and growth of bones
- Divisions of the skeleton
- Appendicular skeleton, Axial skeleton
- Name of all the bones and their parts
- Joints: Classification, Types of movements with examples

**Muscles:** Structure, classification, muscles of abdominal wall, muscles of respiration, pelvic diaphragm, muscles of head and neck

**Practicals:**  
2 hours
- Demonstrations of all bones:
  - Showing parts
  - Joints, X-rays of all normal bones and joints
- Muscles: Classification of muscle

3. **Anatomy of nervous system**  
6 hours

- Introduction and divisions of nervous system
- Central nervous system: Spinal cord, Anatomy, and functions, Reflex arc

**The Brain:**
- Location, gross features, parts, functional areas
- Hindbrain, Midbrain, fore brain
- Coverings of brain and peripheral nervous system
- Anatomy of cerebral blood supply & coverings
- Spinal cord – gross features, extent, blood supply and coverings
- Injuries to spinal cord and brain
- Peripheral nervous system – organization & structure of a typical spinal nerve

**Practicals:**  
1 hour
- Demonstration of brain and spinal cord

4. **Anatomy of Cardiovascular system**

**Gross anatomy & Structural features of the Heart and Great vessels:**

**Heart**  
2 hours
- Location, size, surface features, pericardium & valves
- Right Atrium: structural features
- Venous area, Septum and atrial appendage
- Right Ventricle: structural features, inflow & Out flow characteristics
- Left Atrium: structural features, venous area, Septum and appendage
- Left ventricle: structural features, inflow & out flow characteristics
- Valves: valve apparatus, location
- Structure & functions of each valve
- Blood Supply of heart: coronary arteries, cardiac cycle
- Innervations: sympathetic and parasympathetic sensory
- Pulmonary circuit-names of the arteries and veins & positions
- Lymphatic drainage of the Heart
Great Vessels
Structure of blood vessels and its organization
Aorta
Pulmonary artery & pulmonary vein
General plan of systemic circulation
Pulmonary circulation

PRACTICALS
Demonstration to illustrate normal angiograms.
Demonstration of surface features & interior of the heart
Demonstration of aorta and its branches
Histology of cardiac muscles and artery

5. Anatomy of the Respiratory system
Organs of Respiratory System:
Conducting portion, respiratory portion.
(Nose –nasal cavity, paranasal air sinuses
Larynx,trachea,bronchial tree)
Muscles of Respiration
Cross structure and the interior features of nose & nasal cavity
Para nasal air sinuses
Cross structure and interior features of the pharynx and larynx
Cross structures and interior features of the trachea and bronchial tree
Gross structure, histology, position and coverings of the lungs
Pulmonary circulation – pulmonary arteries pulmonary veins & bronchial arteries
Nerve supply to the respiratory system
Practicals
Demonstration of the parts and function
Demonstration of the different parts of the respiratory system with special emphasis
On lungs
Histology of lungs

6. Anatomy of the digestive system
Components of the digestive system
Alimentary tube
Mouth, tongue, tooth
Salivary gland, liver, biliary apparatus and its secretion, pancreas and pancreatic secretion, movements of intestine defecation, GI hormones malabsorption and
Practicals
Demonstrations of the parts and functions
Normal x-rays

7. Anatomy of excretory system & Reproductive system
Organization of the renal system
Kidneys: location, gross features, structure, blood supply and nerve supply
Excretory ducts, ureters, urinary bladder, urethra location gross features and structure

**Male reproductive system:** 2 hours
Testis, Duct system, Prostate
Female Reproductive system:
Ovaries, duct system, accessory organs

**Practicals** 1 hour
Demonstration of Kidneys, ureter, bladder
Histology of kidney

**8. Anatomy of endocrine system** 1 hour
Name of all endocrine glands and their positions
Hormones and their functions

**9. Histology** 6 hours

**General Slides:**
Hyaline cartilage, Fibro cartilage, Elastic cartilage, T.S & L.S of bone, Blood vessels, Tonsils, Spleen, Thymus, Lymph node, Epithelial tissue, Skeletal and cardiac muscle, Peripheral nerve and optic nerve

**Systemic Slides** 5 hours
- G.I.T
- Lung-Trachea
- Kidney, Ureter, Urinary bladder
- Endocrine- Adrenal, pancreas, pituitary, thyroid and parathyroid
- Uterus, Ovary, testis

**Reference books:**

**Human Anatomy- Regional and Applied Volume**
B.D Chaurasia

**Clinical Anatomy For Medical Students**
Richard S.Snell

********************************************************************

**Paper I – Section B: PHYSIOLOGY**

**Course outcome:**
- CO1: Knowledge of general physiology, nerve-muscle physiology and haematology.
- CO2: Knowledge of basic human physiology with respect to CVS, Respiratory system and GI system.
- CO3: Knowledge of basic human physiology of excretion and CNS.
- CO4: Knowledge of basic human physiology of special senses and endocrine system.

**1. INTRODUCTION TO PHYSIOLOGY AND GENERAL PHYSIOLOGY-1 hr**

**2. MUSCLE and NERVE - 3 hrs**
- Neurons and glial cells - Structure, function, Types, electrical property, degeneration and regeneration.
- Muscle- Structure & Functions of skeletal muscle & smooth muscle
- Neuromuscular transmission – Functional anatomy, Transmission & Clinical importance.

3. HAEMATOLOGY - 9 hrs
- Fluid compartments, Composition & functions of blood, Plasma protein – names, functions.
- Leucocytes - Morphology, Types, Properties & Functions, variations in count.
- Thrombocytes- Morphology, Count, Function, Variations.
- Blood groups and its importance, Blood transfusion.
- Tissue fluid and Lymph
- Immunity.

4. CARDIOVASCULAR SYSTEM - 10 hrs
- Organisation of CVS, Properties of Cardiac Muscle, Origin and spread of cardiac impulse
- Cardiac Cycle – Electrical (ECG) and mechanical events,
- Cardiac output, Measurement, (Fick’s Principle) regulation
- Blood pressure, measurement & variation, determinants, regulation, Shock.
- Regional circulation. (Salient features only)-coronary, Pulmonary, Cerebral, Cutaneous

5. RESPIRATORY SYSTEM - 8 hrs
- Alveolar ventilation, Dead space, Ventilation perfusion ratio and its significance,
- Spirogram
- Diffusion of gases, O₂ transport, CO₂ transport.
- Regulation of respiration – Voluntary, Neural, Chemical.
- Abnormalities of respiration Hypoxia, Cyanosis, Dyspnea, Asphyxia, High altitude,
- Dysbarism.

6. DIGESTIVE SYSTEM - 7 hrs
- Functional anatomy of GI tract,
- Secretions - Salivary secretion & its regulation, Gastric secretion and its regulation,
- Peptic ulcer, Pancreatic secretion and its regulation, Functions of liver. Bile – storage and functions. Intestinal juice
- Movements - Mastication, Deglutition, Movements of stomach, Small intestine, Large intestine. vomiting, Defecation.
- GI Hormones,
- Digestion & Absorption of carbohydrates, Proteins, Fat & vitamins

7. Excretion - 7 hrs
- Functional anatomy of kidney, Structure and function of kidney and nephron
• Renal blood flow, Glomerular filtration rate, Definition, Measurement and factors
• affecting Tubular functions – Reabsorption, Secretion, Acidification, concentration and abnormalities.
• Micturition – Bladder innervation, Micturition reflex.
• Functions of skin

8. ENDOCRINOLOGY - 6 hrs
a) Introduction to endocrinology (Different glands, hormones)
b) Pituitary gland (Anteral and posterior glands, actions and applied aspects).
c) Thyroid gland (Actions and applied aspects)
d) Calcium homeostasis (Parathyroid, Vitamin D, Calcitonin, actions and applied aspects)
e) pancreas (Endocrine part – insulin, glucagon – actions and applied aspects)
f) Adrenal cortex and medulla (Actions and applied aspects)

9. REPRODUCTIVE SYSTEM - 3 hrs
• Male Reproductive System- Different parts, spermatogenesis, hormones
• Female reproductive system – Different parts, Sexual cycles – Menstrual cycles – Ovarian, endometrium
• Lactation, Pregnancy & Contraception (Basics only)

10. CENTRAL NERVOUS SYSTEM (Basics only) - 10 hrs
a) Organization of Nervous system.
b) Synapse, Properties & Function
c) Reflexes, Reflex action, Property, Function.
d) Sensory system – Receptor, Ascending sensory pathway (basics only), Thalamus, sensory cortex
e) Motor System – Spinal control of Motor activity, Motor areas in Cerebral Cortex,
f) Pyramidal & extra pyramidal tracts (basics only),
g) Basal ganglia & Cerebellum.
h) Hypothalamus
i) Autonomous nervous system
j) Cerebro spinal fluid- formation and functions.

11. SPECIAL SENSES (Basics only) - 4 hrs
• Audition
• Vision

Revision and evaluation session – 4-5 hours

Reference books:
Essentials of Medical Physiology
Anil Baran Singha Mahapatra

******************************************************************************

Paper II – AHS12
Section A: BIOCHEMISTRY

Course outcome:
• CO1: Knowledge of biochemistry of cell structure, functions, digestion, enzymes and proteins.
- CO2: Knowledge of biochemistry of carbohydrates, minerals and vitamins.
- CO3: Knowledge of biochemistry of liver and renal function tests, specialized laboratory investigations and lipids.
- CO4: Knowledge of biochemistry of metabolism, homeostasis, nucleic acids and cancer.

I. CELL STRUCTURE & FUNCTIONS 1hr
- Mitochondria
- Endoplasmic reticulum, Lysosomes
- Fluid mosaic model for membrane structure

II. DIGESTION AND ABSORPTION OF NUTRIENTS 2hrs
- Digestion of carbohydrates
- Fats
- Enzymes in digestion of proteins

III. ENZYMES 1hr
- Normal serum range and diagnostic importance of serum AST, ALP, ALT, CK, GGT and AMYLASE.

IV. PROTEINS 1hr
- Essential amino acids
- Plasma proteins
- Immunoglobulins

V. CARBOHYDRATES 2hr
- Diabetes mellitus - symptoms and complications
- Glucose tolerance test
- Action of insulin and glucagon on carbohydrate metabolism

VI VITAMINS 2hrs
- Deficiency manifestations of Vitamin A, C, D, E, K
- Vit B Complex

VII MINERALS 1hr
- Factors maintaining serum calcium level and important functions of calcium
- Importance of trace elements

VIII HEMOGLOBIN 1hr
- Hemoglobin metabolism

IX LIVER FUNCTION TESTS 1hr
- Jaundice and types of jaundice
- Enzymes in liver disease

X RENAL FUNCTION TESTS 1hr
- Serum Creatinine

XI SPECIALIZED LABORATORY INVESTIGATIONS 1hr
- Principle and applications of Radioimmunoassay (RIA)
- ELISA
- Colorimetry

XII LIPIDS 1hr
- Essential fatty acids (EFA)
- Poly unsaturated fatty acids (PUFA)
• Phospholipids

**XIII METABOLISM**

• TCA cycle (steps only)

**XIV MAINTENANCE OF HOMEOSTASIS**

• Plasma buffers
• Renal mechanisms in pH regulation
• Anion gap
• Metabolic acidosis,

**XV NUCLEIC ACIDS**

– DNA and RNA
– Purine and pyrimidine bases,

**XVI CANCER**

– Chemical and physical carcinogens
– Tumor markers.

********************************************************************

**Paper II – Section B: PHARMACOLOGY**

Course outcome:

• CO1: Basic knowledge in pharmacology.
• CO2: Detailed systemic pharmacology.
• CO3: Detailed knowledge of drugs and groups of drugs.

Course

• General Pharmacology – 4 hours
• Evaluation of drugs in man, drug prescribing and drug interactions – 3 hours
• Sedatives, hypnotics and pharmacotherapy of insomnia – 1 hour
• Drugs effective in convulsive disorders – 1 hour
• Opioid analgesics – 1 hour
• Analgesic – antipyretics and non-steroidal anti-inflammatory drugs – 1 hour
• Psychopharmacology – 1 hour
• Drug therapy of parkinsonism and other degenerative disorders of the brain – 1 hour
• Local anesthetics – 1 hour
• Adrenergic and adrenergic blocking drugs – 1 hour
• Histamine and anti histamic drugs – 1 hour
• Pharmacotherapy of cough – 1 hour
• Pharmacotherapy of bronchial asthma and rhinitis – 1 hour
• Digitalis and pharmacotherapy of cardiac failure – 1 hour
• Vasodilator drugs and pharmacotherapy of angina pectoris – 1 hour
• Pharmacotherapy of hypertension – 1 hour
- Drugs and blood coagulation – 1 hour
- Drugs effective in iron deficiency and other related anemias – 1 hour
- Diuretics – 1 hour
- Emetics, drug therapy of vomiting, vertigo and diarrhea – 1 hour
- Pharmacotherapy of constipation – 1 hour
- Pharmacotherapy of peptic ulcer – 1 hour
- Sulfonamides, Trimethoprim, cortimoxazole, nitrofurans and quinolones – 1 hour
- Penicillins and antibiotics effective mainly against gram positive organisms – 1 hour
- Amonoglycosides and other antibiotics effective mainly against gram negative organisms – 1 hour
- Antibiotics effective against both gram positive and gram negative organisms – 1 hour
- General principles of chemotherapy of infections – 1 hour
- Chemotherapy of urinary tract infections – 1 hour
- Antiseptics, disinfectants and insecticides – 1 hour
- Thyroid and antithyroid drugs – 1 hour
- Insulin and ant diabetic drugs – 1 hour
- Adrenal cortical steroids – 1 hour
- Vitamins and antioxidant – 1 hour
- Drugs, pregnancy and the newborn – 1 hour

Reference books:

Essentials of Medical Pharmacology  
Tripathi

Basic and Clinical Pharmacology  
Katzung

********************************************************************

Paper III – AHS 13

Section A: MICROBIOLOGY

Course Outcome:
- CO1: To understand the morphological characters of bacteria.
- CO2: To master the preparation of smear, fixation and staining of bacterial smears and its quality control methods
- CO3: Learn to use microscope, autoclave, hot air oven, water bath, steamer, filters
- CO4: To differentiate between innate and adaptive immunity, and explain the main defences lines as well as biological barrier to the infections.
- CO5: Employ antigen–antibody interaction to conduct different immunological and serological tests in the laboratory

Introduction to medical microbiology - 1 hr
Morphology and physiology of bacteria - 1 hr
Sterilization and disinfection - 2 hrs
Normal Microbial flora of the human body - 1 hr
Infection - 2 hrs
Antibiotics - 1 hr
Hospital infections and prevention - 2 hrs
Immunity - 1 hr
Antigen, Antibody, Antigen-antibody reactions - 1 hr
Immune response - 1 hr
Hypersensitivity - 1 hr
Immunoprophylaxis - 1 hr
Tuberculosis - 1 hr
Typhoid - 1 hr
Virus infections - 1 hr
HIV/AIDS - 1 hr
Hepatitis viruses - 1 hr
Medical Mycology - 1 hr
Medical Parasitology - 1 hr
Malaria - 1 hr
Urinary Tract Infections - 1 hr
Respiratory Tract Infections - 1 hr
Gastrointestinal Infections - 1 hr
Sexually Transmitted Disease - 1 hr
Infections of the nervous system - 1 hr

**Practical Demonstrations**
Gram Staining - ½ hr
Acid Fast Staining - ½ hr
Antibiotic Susceptibility Testing - ½ hr
CSSD Visit - ½ hr
Theory Class Hours - 28 hrs
Practical Demonstration hours - 2 hrs

**Total hours** - 30 hrs

**Reference books:**
- Text Book of Medical Paracytology
  C.K.Jayaram Panicker
- Text Book of Microbiology
  Anand Narayan

----

**Paper III – Section B: PATHOLOGY**

**Course Outcome:**
- CO1: Knowledge of general and systemic pathology.
- CO2: Knowledge of pathology of neoplasms.
- CO3: Knowledge of basics of community health.

**1. Introduction to Pathology** - 3 hrs

- Histopathology- Methods and techniques
- Cytology-FNAC,Exfoliative advantages and limitations of cytology
- Hematology-Sample collection.
- Immunohistochemistry, Immunofluorescence, Electron microscopy, Flow cytometry

2. Cell injury & adaptations  
   - Etiology  
   - Reversible & Irreversible cell injury  
   - Necrosis & Apoptosis  
   - Gangrene - Dry - Wet  
   - Atrophy, Hypertrophy, Hyperplasia, Metaplasia, Dysplasia.  
   Fatty change

3. Inflammation & Repair  
   - What is inflammation  
   - Signs of inflammation, Acute and chronic inflammation, Types of inflammation, Giant cells, Macrophages, Ulcer, abscess, Acute inflammation, Systemic effects of acute inflammation  
   - Factors affecting healing- Complications of healing

4. Hemodynamic Disorders  
   - Definition of edema and causes of edema  
   - Exudate and transudate  
   Shock – Definition and types of shock  
   Thrombosis  
   Embolism- Definition and types of emboli , Pulmonary thromboembolism

5. Neoplasia  
   - Definition  
   - Difference between benign and malignant cells, Nomenclature of tumors  
   - Routes of metastasis of tumours,- Staging of tumour,- Etiology of cancers - Diagnosis of cancer, including tumour markers

6. CVS  
   - Definition of Ischaemia, Infarction, Aneurysm  
   - Rheumatic heart disease, Infective endocarditis, Atherosclerosis  
   - Myocardial infarction, Hypertension and pericardial effusion

7. Respiratory system
- Tuberculosis, Pleural effusion, Pneumonia, COPD and tumours

8. GIT  
- Peptic ulcer, - Carcinoma of oesophagus, Stomach & Colon,  
- Inflammatory bowel disease (UC & Crohns)

9. Liver and GB  
- Hepatitis. Cirrhosis, Tumours of liver  
  • Cholecystitis and GB calculi

10. Renal  
- Glomerulonephritis & Pyelonephritis  
- Renal calculi -Nephrotic syndrome, Renal tumors, Polycystic renal diseases-

**Internal assessment  Exam -1 ½ hrs**

11. MGS  
- Cryptorchidism,Orchitis, epididymitis, Prostatic hyperplasia  
  • Carcinoma penis, Testicular tumors

12. FGS & Breast  
- Ovarian tumours, - Fibroid- Carcinoma cervix- Carcinoma endometrium pap smear  
  Fibroadenoma breast, Carcinoma Breast-Predisposing factors  
  & TNM

13. CNS  
- Meningitis & encephalitis.- Alzheimer’s disease,  
  Tumours - Meningioma, Gliomas, Metastasis  
  CSF collection, indication and contraindication, tests performed, cytocentrifuge

14. Skin & soft tissue  
Skin- SCC, Melanoma,BCC inflammatory lesions lipoma,

15. Bone  
- Osteoporosis, Osteomyelitis,Rickets ,Osteomalacia  
  Tumours – Osteosarcoma, Osteoclastoma , Ewings sarcoma & Arthritis
16. **Endocrine**  
Organs, Pituitary, Adrenal brief; Thyroid – Goitre thyroiditis and tumours  
   Diabetes and its complications

17. **Anaemias** - Types of anaemia  
1hr

18. **WBC disorders**  
Non neoplastic and neoplastic  
1hr

19. **Lymphoreticular system**  
Lymphadenitis, Lymphomas  
1hr

20. **Platelet and coagulation abnormalities**  
Primary & Secondary Hemostasis  
2hrs

21. **Clinical Pathology I**  
Blood collection, anticoagulants used, vacuettes and their color code, complete hemogram and the various parameters, Bone marrow – Indication of BM study & collection procedure, PT, APTT sample collection  
1hr

22. **Clinical Pathology II**  
Urine analysis – Physical, Chemical, microscopic, Dipstick parameters  
1hr

23. **Transfusion Medicine**  
Blood grouping, cross matching, Screening of donor, Precautions to take when you start blood transfusion, Monitoring during transfusion, Transfusion reactions, Blood components.  
1hr

**Internal assessment**  
**Exam - 1 ½ hrs**

**Lab visit:**  
Histopathology lab - 1hr  
Hematology lab & blood bank: 1hr  
Cytology lab: 1hr

**Total Hours:** 29 hrs lecture + 3hrs exam + 3 hrs lab visit = 35 hrs

**Reference Books:**

Basic Pathology: An introduction to the mechanisms of disease  
Sunil R Lakhani, Susan A Dilly, Caroline J Filayson

******************************************************************************
### Course outcome:
- CO1: basic understanding of use of computer.
- CO2: Applications of computer in clinical departments.
- CO3: Detailed knowledge on how to use hospital information system.

### Course Description:
This course is designed for students to develop basic understanding of the use of computers and its applications in Clinical Departments.

Paper IV – Section B: QUALITY ASSURANCE AND ACCREDITATION

Course outcome:
- CO4: Introduction and basic concept of quality.
- CO5: Standardization and Implementation

Course Objectives:
Modernization and its brand conscious make an organization thrive towards perfection in the comparative world of business. The underlying factor that allows an organization to stand the test of time is quality. The students are given the working knowledge of the subject.

Course Content:
- Introduction to quality - 2 hrs
- Definition, Concept, Benefits - 2 hrs
- Function - 2 hrs
- Design - 2 hrs
- Formulation - 2 hrs
- Standardization - 2 hrs
- Implementation - 2 hrs
- Factors affecting quality - 2 hrs
- Need for quality - 2 hrs
- Quality cycle - 2 hrs
- Quality objectives - 2 hrs
- Quality policy - 2 hrs
- Quality measurable - 2 hrs
- Quality Control, Quality Standards, Q C Tools - 6 hrs
- Quality Documents, QC Records, Kazen techniques - 2 hrs
Such as Market-in, TOC, Q C Circles, - 2 hrs
Suggestion scheme, TPM, Kanban, - 2 hrs
JIT, Zero defect programme - 2 hrs
ISO - 2 hrs
Quality management system Quality manual - 2 hrs
Quality procedures - 4 hrs
Quality records - 4 hrs
Quality audit - 4 hrs
Correlative and preventive action - 2 hrs
SQC (Statistical Quality Control techniques) - 2 hrs
Cost effectiveness - 2 hrs
Cost of quality system - 2 hrs
Benefit in total cost - 4 hrs
Cost measuring system - 4 hrs
TQM- Concept, awareness, aspects train - 4 hrs
Total - 80 hrs

Detailed Course Plan

Unit- I
Introduction to quality –Definition, concept, Benefits-Functions-Design- Formulation- Standardization

Unit-II
Implementation –Factors affecting quality –Need for Quality Cycle –Quality objectives- Quality policy

Unit-III

Unit-IV
ISO- Quality management system- Quality manual-Quality procedure- Quality records- Quality audit

Unit- V
Corrective and preventive action –SQC (Statistical Quality Control technique)
Cost effectiveness- Cost of quality system- Benefit in total cost –Cost
Measuring system- TOM- concept, awareness, aspects training

******************************************************************************
**Paper V (AHS 15): ENGLISH**

**Course Description**: The course is designed to enable students to enhance ability to comprehend spoken and written English (and use English) required for effective communication in their professional work. Students will practice their skills in verbal and written.

**Course Outcome**
- CO1: Develop their intellectual, personal and professional abilities.
- CO2: Acquire basic language skills (listening, speaking, reading and writing) in order to communication with speakers of English language.
- CO3: Acquire the linguistic competence necessarily required in various life situations.

*************************************************************************************
SECOND YEAR

Posting in Emergency room, clinical lectures and practice sessions.

Internal Assessment

Three sessional examinations will be conducted in this year. Average marks of these sessional examinations will be counted as internal marks along with performance in the clinical posting.

********************************************************************

**Paper VI: CARDIOLOGY, HAEMATOLOGY, GASTROENTEROLOGY, DIABETES, MUSCULOSKELETAL SYSTEM, CRITICAL CARE PATIENT MONITORING (BEMT21)**

**Course Outcome:**
1. CO1: Basic knowledge in pathophysiology and management of the systems cardiology, hematology
2. CO2: Basic knowledge in the pathophysiology and management of systems gastroenterology and diabetes
3. CO3: Basic knowledge in the pathophysiology and management of musculoskeletal system
4. CO4: Basic knowledge in critical care monitoring

Pathophysiology and management aspects of following systems

Cardiology, Hematology, Gastroenterology, Diabetes, Musculoskeletal system

Critical care patient monitoring

Microbiology of Valvular Heart Diseases

Recent Advances in Critical care monitoring

Pathology of various Endocrine Disorders

********************************************************************

**Paper VII: PULMONOLOGY, NEPHROLOGY, TRIAGING AND DISASTER MANAGEMENT, INVASIVE AND NON INVASIVE VENTILATION, CNS, ELECTROCARDIOGRAPHY (BEMT22)**

**Course Outcome:**
1. CO1: Basic knowledge in pathophysiology and management of the systems pulmonology, nephrology
2. CO2: Basic knowledge in pathophysiology and management of CNS
3. CO3: Triaging and disaster management
Pathophysiology and management aspects of following systems Pulmonology, Nephrology, CNS and Triaging and disaster management, Invasive and non-invasive ventilation, Electrocardiography.
Clinical Examination of Central Nervous system

Emergency Drugs used in CNS disorders

Identification of Acidosis/Alkalosis

********************************************************************

THIRD YEAR
Posting in Emergency medicine, ICU, Emergency medical transport

Internal Assessment

One sessional examination and one model examination will be conducted in this year. Average marks of these two examinations will be counted as internal marks along with performance in the clinical posting.

********************************************************************

Paper VIII: Basic Sciences in Emergency Medicine
Course outcomes: (BEMT31)

1. CO1: Basic knowledge in Medical/Legal and Ethical Issues
2. CO2: Basic knowledge in Focused History and Physical Exam in medical and trauma patients
3. CO3: Detailed knowledge in general physical examination
4. CO4: Detailed knowledge in communication and documentation

Introduction to Emergency Medical Care
Familiarizes the EMT-Basic candidate with the introductory aspects of emergency medical care. Topics covered include the Emergency Medical Services system, roles and responsibilities of the EMT-Basic, quality improvement, and medical direction.

Well-Being of the EMT-Basic
Covers the emotional aspects of emergency care, stress management, introduction to Critical Incident Stress Debriefing (CISD), scene safety, body substance isolation (BSI), personal protection equipment (PPE), and safety precautions that can be taken prior to performing the role of an EMT-Basic.

Medical/Legal and Ethical Issues
Explores the scope of practice, ethical responsibilities, advance directives, consent, refusals, abandonment, negligence, duty to act, confidentiality, and special situations such
as organ donors and crime scenes. Medical/legal and ethical issues are vital elements of the EMT-Basic's daily life.

**Baseline Vital Signs and SAMPLE History**
Teaches assessing and recording of a patient's vital signs and a SAMPLE history.

**General Examination including Head to foot Examination**
Checking Pallor, Icterus, Clubbing, cyanosis, lymphadenopathy, edema

**Lifting and Moving Patients**
Provides students with knowledge of body mechanics, lifting and carrying techniques, principles of moving patients, and an overview of equipment. Practical skills of lifting and moving will also be developed during this lesson.

**Airway**
Teaches airway anatomy and physiology, how to maintain an open airway, pulmonary resuscitation, variations for infants and children and patients with laryngectomies. The use of airways, suction equipment, oxygen equipment and delivery systems, and resuscitation devices will be discussed in this lesson.

**Scene Size-Up**
Enhance the EMT-Basic's ability to evaluate a scene for potential hazards, determine by the number of patients if additional help is necessary, and evaluate mechanism of injury or nature of illness. This lesson draws on the knowledge of Lesson 1-2.

**Initial Assessment**
Provides the knowledge and skills to properly perform the initial assessment. In this session, the student will learn about forming a general impression, determining responsiveness, assessment of the airway, breathing and circulation. Students will also discuss how to determine priorities of patient care.

**Focused History and Physical Exam - Trauma Patients**
Describes and demonstrates the method of assessing patients' traumatic injuries. A rapid approach to the trauma patient will be the focus of this lesson.

**Focused History and Physical Exam - Medical Patients**
Describes and demonstrates the method of assessing patients with medical complaints or signs and symptoms. This lesson will also serve as an introduction to the care of the medical patient.

**Detailed Physical Exam**
Teaches the knowledge and skills required to continue the assessment and treatment of the patient.

**On-Going Assessment**
Stresses the importance of trending, recording changes in the patient's condition, and reassessment of interventions to assure appropriate care.

**Communications**
Discusses the components of a communication system, radio communications, communication with medical direction, verbal communication, interpersonal communication, and quality improvement.

**Documentation**
Assists the EMT-Basic in understanding the components of the written report, special considerations regarding patient refusal, the legal implications of the report, and special reporting situations. Reports are an important aspect of prehospital care. This skill will be integrated into all student practices.

**Creating Less stressful Environment**
Creating a calm and peaceful environment in order to work properly

**Advanced Airway**
Instructs students on how to maintain an airway by means of orotracheal intubation. Included is a review of basic airway skills, nasogastric tube insertion for decompression of the stomach of an infant or child patient, and orotracheal intubation of adults, infants and children. This lesson should be presented prior to the medical and trauma modules

**Basic Life Support**
Physiology and pathology of problems requiring BLS

********************************************************************************

**Paper IX: Medical Emergencies BEMT32**

**Course Outcomes:**
1. CO1: Detailed knowledge in general pharmacology
2. CO2: Detailed knowledge in respiratory and cardiovascular emergencies
3. CO3: Basic knowledge in diabetes/altered mental status
4. CO4: Basic knowledge in poisoning/overdose, environmental emergencies
5. CO5: Basic knowledge in obstetrics, BLS

**General Pharmacology**
Provides the student with a basic knowledge of pharmacology, providing a foundation for the administration of medications given by the EMT-Basic and those used to assist a patient with self-administration.

**Respiratory Emergencies**
Reviews components of the lesson on respiratory anatomy and physiology. It will also provide instruction on assessment of respiratory difficulty and emergency medical care of respiratory problems, and the administration of prescribed inhalers.

**Cardiovascular Emergencies**
Reviews of the cardiovascular system, an introduction to the signs and symptoms of cardiovascular disease, administration of a patient’s prescribed nitroglycerin, and use of the automated external defibrillator.

**Diabetes/Altered Mental Status**
Reviews of the signs and symptoms of altered level of consciousness, the emergency medical care of a patient with signs and symptoms of altered mental status and a history of diabetes, and the administration of oral glucose.

**Allergies**
Teaches the student to recognize the signs and symptoms of an allergic reaction, and to assist the patient with a prescribed epinephrine auto-injector.

**Poisoning/Overdose**
Teaches the student to recognize the signs and symptoms of poisoning and over-dose. Information on the administration of activated charcoal is also included in this section.

**Environmental Emergencies**
Covers recognizing the signs and symptoms of heat and cold exposure, as well as the emergency medical care of these conditions. Information on aquatic emergencies and bites and stings will also be included in this lesson.

**Behavioral Emergencies**
Develops the student's awareness of behavioral emergencies and the management of the disturbed patient. Restraining the combative patient will also be taught in this lesson.

**Status Epilepticus**
Immediate steps and Identification of problem

**Obstetrics/Gynecology**
Reviews the anatomical and physiological changes that occur during pregnancy, demonstrate normal and abnormal deliveries, summarize signs and symptoms of common gynecological emergencies, and neonatal resuscitation.

**Emergencies in Nephrology**
Acid base imbalance, Renal Failure, ABG interpretation

**Basic Life support and Advanced cardiac life support**

Chairman X: Trauma, Surgical emergencies and Emergency medical transport (BEMT33)

**Course outcome**
1. CO1: Basic knowledge in trauma
2. CO2: Basic knowledge in soft tissue injuries and musculoskeletal care
3. CO3: Basic knowledge in emergencies related to infants and children
4. CO4: Basic knowledge in ambulance operations and gaining access
5. CO5: Basic knowledge in ATLS

TRAUMA
Reviews the cardiovascular system, describes the care of the patient with internal and external bleeding, signs and symptoms of shock (hypoperfusion), and the emergency medical care of shock (hypoperfusion).

**Soft Tissue Injuries**
Continues with the information taught in Bleeding and Shock, discussing the anatomy of the skin and the management of soft tissue injuries and the management of burns. Techniques of dressing and bandaging wounds will also be taught in this lesson.

**Musculoskeletal Care**
Reviews of the musculoskeletal system before recognition of signs and symptoms of a trauma. Painful, swollen, deformed extremity and splinting are taught in this section.

**Injuries to the Head and Spine**
Reviews the anatomy of the nervous system and the skeletal system. Injuries to the spine and head, including mechanism of injury, signs and symptoms of injury, and assessment. Emergency medical care, including the use of cervical immobilization devices and short and long back boards will also be discussed and demonstrated by the instructor and students. Other topics include helmet removal and infant and child considerations.

**Injuries to Ear, Nose, Throat**
Tympanic membrane Perforation, Nasal bleeds, Trauma to Throat region

**Infants and Children**
Presents information concerning the developmental and anatomical differences in infants and children, discuss common medical and trauma situations, and also covered are infants children dependent on special technology. Dealing with an ill or injured infant or child patient has always been a challenge for EMS providers.

**Ambulance Operations**
Presents an overview of the knowledge needed to function in the prehospital environment. Topics covered include responding to a call, emergency vehicle operations, transferring patients, and the phases of an ambulance call.

**Injuries in the UroGenital Area**
Includes Testicular Tortion, Hernia, Genital Injuries

**Gaining Access**
Provides the EMT-Basic student with an overview of rescue operations. Topics covered include roles and responsibilities at a crash scene, equipment, gaining access, and removing the patient.

**Recent Advances in Gaining Access**
Includes Interosseous line, and other latest modalities

**Overviews**
Provides the EMT-Basic student with information on hazardous materials, incident management systems, mass casualty situations, and basic triage.
Advanced trauma life support

Recommended Book for second and third: Nancy Caroline Emergency Medicine in street Volume one and two

********************************************************************

Paper XI - Practical

Practical Skills Lab: Airway
Provides supervised practice for students to develop the psychomotor skills of airway care. The use of airways, suction equipment, oxygen equipment and delivery systems, and resuscitation devices will be included in this lesson. Demonstrates the skills of advanced airway techniques for the EMT-Basic. This includes insertion of the nasogastric tube in infant and child patients and orotracheal intubation of adults, infants and children.

Practical Skills Lab: Infants and Children
Provides the EMT-Basic student with the opportunity to interact with infants and children, and to practice the knowledge and skills learned thus far concerning this special population.

Practical Skills Lab: Trauma
Provides practice of the assessment and management of patients with traumatic injuries.

Practical Skills Lab: BLS/ACLS/ATLS

Individual Projects and VIVA
FOURTH YEAR

Internship

Description:

One-year compulsory internship in various clinical areas in Amrita Institute of Med- ical Sciences during which the students get to hone their skills and knowledge ac- quired in the three years of rigorous study. During this period their work is very similar to what is expected from them after the completion of their training. The training ensures their readiness to approach a patient in any setting.

Eligibility:

Student who has successfully completed his/her theory and practical in the first three years of the programme.

Duration:

One year (compulsory Internship) at Amrita Institute of Medical Sciences. A sti- pend will be provided in accordance with the hospital policy.
# SCHEME OF EXAMINATION

</table>
**PATTERN OF QUESTION PAPERS**

1. **Paper I to Paper IV**

   The duration of each theory paper will be three hours; the paper will have two sections (Section A & Section B) each carrying 50 marks and a total of 100 marks.

   **Pattern of Question Paper**
   
   Essay Questions* (2 out of 2) - 20 marks (2 x 10 marks)
   Short Notes (3 out of 4) - 15 marks (3 x 5 marks)
   Short answer question (5 out of 7) - 15 marks (5 x 3 marks)

   Total Marks - 50 marks

2. **Paper V**

   The duration of Paper V will be two hours; the paper will have only one section for a total of 50 marks.

   **Pattern of Question Paper**
   
   Essay Questions* (2 out of 2) - 20 marks (2 x 10 marks)
   Short Note (5 out of 7) - 30 marks (5 x 6 marks)

   Total Marks - 50 marks

3. **Paper VI to Paper X**

   The duration of each theory paper will be three hours; the paper will have only one section of 100 marks.

   **Pattern of Question Paper**
   
   Essay Questions* (4 out of 4) - 40 marks (4 x 10 marks)
   Short Notes (6 out of 8) - 30 marks (6 x 5 marks)
   Short answer question (10 out of 12) - 30 marks (10 x 3 marks)

   Total Marks - 100 marks

* Marks distribution should be subdivided and specified
