PROGRAM  
MD PATHOLOGY  
(Revised with effect from 2016-2017 onwards)
Table of Contents

Program Outcomes 3
Program Specific Outcomes 4
Methods Of Training 4
Teaching /Learning Content 5
Division Into Courses 6
Evaluation System 13
GOAL:

The goal of postgraduate medical education shall be to produce competent specialist. Who shall recognize the health needs of the community and carry out professional obligation ethically and in keeping with the objectives of the national health policy;

(i) Who shall have mastered most of the competencies, retaining to the specialty, that are required to be practiced at the secondary and tertiary levels of the healthcare delivery system.

(ii) Who shall be aware of contemporary advances and developments in the discipline concerned.

(iii) Who shall have acquired a spirit of scientific inquiry and oriented to the principles of research methodology epidemiology and

(iv) Who shall have acquired the basic skills in teaching of the medical and paramedical professionals.

OBJECTIVES:

At the end of the course a candidate must be able to

(i) Understand and explain about the factors in causation of disease.

(ii) Understand processes involved in the gross and microscopic changes of organs and tissues and explain these changes.

(iii) Understand and explain the basis of evolution of clinical signs and symptoms.

(iv) Should be able to perform procedures designated for laboratory detection of diseases.

(v) Should be able to process and accurately interpret the representative materials obtained from the patients in order to arrive at a correct diagnosis.

(vi) Should be able to recognize and report morphological changes in cells, tissues and organs.

(vii) Should be able to plan, perform and report specific research projects.

(viii) Should be able to perform clinical autopsy and present CPC (Clinico Pathological Correlation)

PROGRAM OUTCOMES

PO1: Recognize the health needs of the community and carry out professional obligation ethically and in keeping with the objectives of the national health policy.

PO2: Master most of the competencies, retaining to the specialty, that are required to be practiced at the secondary and tertiary levels of the healthcare delivery system.

PO3: Be aware of contemporary advances and developments in the discipline concerned.

PO4: Acquire a spirit of scientific inquiry and oriented to the principles of research methodology epidemiology

PO5: Acquire the basic skills in teaching of the medical and paramedical professionals.
PROGRAM SPECIFIC OUTCOMES

PSO1: Understand and explain about the factors in causation of disease.
PSO2: Understand processes involved in the gross and microscopic changes of organs and tissues and explain these changes.
PSO3: Understand and explain the basis of evolution of clinical signs and symptoms.
PSO4: Should be able to perform procedures designated for laboratory detection of diseases.
PSO5: Should be able to process and accurately interpret the representative materials obtained from the patients in order to arrive at a correct diagnosis.
PSO6: Should be able to recognize and report morphological changes in cells, tissues and organs.
PSO7: Should be able to plan, perform and report specific research projects.
PSO8: Should be able to perform clinical autopsy and present CPC (Clinico Pathological Correlation)

METHODS OF TRAINING

Duration of course – 3 years.

(i) **On job training**
- Histopathology including techniques and reporting
- Cytology including FNAC, fluid cytology, exfoliative cytology- techniques and reporting
- Haematology including blood banking and transfusion medicine- techniques and reporting
- Clinical pathology- techniques and reporting
- Museum techniques
- Autopsy techniques and interpretation
- Serology- techniques and reporting
- Handling of hazardous material
- Handling, maintenance and calibration of instruments used in laboratory
- Undergraduate teaching

(ii) **P.G. Teaching sessions**
- Journal review
- Subject seminar
- Grossing discussions for autopsies and surgical material
- Slide seminars including histopathology, haematology, and cytopathology
- Clinical case- group discussion
- Interdepartmental seminars

Postgraduate students should be encouraged to attend CME, Workshops, Conferences & present papers.

TEACHING /LEARNING CONTENT

A. THEORY
I BASIC SCIENCES
Anatomy/histology of all structures in human body/organs
- Physiology and biochemistry-Basic aspects of various metabolism and functioning of endocrines
- Genetics-Fundamental / applied aspects
- Biostatistics
- Biomedical ethics-ethical issues related to Medical practice and research

II PATHOLOGY
Historical aspects
- General pathology
- Systemic pathology
- Haematology
- Blood banking and Transfusion Medicine
- Cytopathology
- Clinical Pathology
- Medical autopsy: Techniques and interpretation
- Recent advances in all fields, related to Pathology
- Organization of laboratory including quality control

III CLINICAL BIOCHEMISTRY
Routine biochemical investigations and various organ function tests i.e. LFT, RFT etc.

B. PRACTICAL
Proficiency of technological methods should include the following:
1. Fields in which high degree of professional competence and theoretical knowledge is expected:-
   a) Gross pathology and histopathology
   b) Haematology
   c) Cytopathology
   d) Clinical pathology and Blood banking

2. Fields in which student is expected to achieve reasonable working knowledge and skills to be able to run laboratory services independently
   a) Clinical chemistry
   b) Clinical Microbiology
   Routine Microbiological investigations including culture & sensitivity

3. Fields in which student is expected to achieve general acquaintance of techniques to understand and interpret data
   a) Immunopathology
   b) Histochemistry
   c) Immunohistochemistry
   d) Cytogenetics
   e) Molecular biology
Division into Courses

Course 1 (General Pathology)
Objectives:
1. Understand response of cells/tissue to various injurious agents
2. Understand the basis of differentiation between benign and malignant tumours
3. Identify different infectious organisms and their tissue reactions
4. Relevance of genetic basis of diseases
5. Understand causes and pathogenesis of disease

Course 2 (Haematology, clinical pathology, cytology, transfusion medicine)
1. Planning of tests, interpretation and diagnosis of haematological diseases
2. Knowledge of automation and quality assurance in Haematology
3. Possess the knowledge necessary for the evaluation and reporting of cytopathology specimens along with ability to independently perform fine needle aspiration of palpable superficial lumps in patients and make good quality smears
4. Have reasonable working knowledge of blood banking
5. Knowledge of principles of all clinical pathology tests and significance of altered values and interpretation

Course 3 (Systemic pathology)
1. Be able to identify, and systematically and accurately describe the chief gross anatomic alterations in the surgically removed specimens and take appropriate tissue sections
2. Be able to correctly diagnose majority of the cases in routine reporting
3. Knowledge of tissue-processing and understanding of the principles of automatic tissue-processing machine
4. Be aware of the technique of autopsy and have sufficient understanding of various disease processes, so that a meaningful clinico-pathological correlation can be made.

Course 4 (Recent advances in Pathology)
1. Familiarity with the principles, procedures and interpretation of various immunohistochemical stains
2. Familiarity with principles and techniques of electron microscopy and the working of an electron microscope
3. Familiarity with importance of statistical methods in assessing data from patient material and experimental studies
4. Understand the principles of molecular testing especially related to the disease processes and theranostic applications in various diseases
5. Knowledge on immunofluorescence techniques especially in kidney and skin biopsies

Soft Skills:
1. Ability to design and implement a research project
2. Competency to interact with/counsel patients and relatives in a proper manner.
3. Fostering proper work culture
4. Ability work as a part of a team
5. Knowledge of principles of biomedical ethics

POSTING SCHEDULE:
1) Histopathology – 12 months
2) Autopsy - 3 months
3) Clinical pathology & Haematology - 9 months
4) Cytopathology – 6 months
5) Blood Bank – 1 month
6) Biochemistry : - 15 days
7) Microbiology: - 15 days
8) Museum :- 15 days
9) Revision in all sections :- 31/2 months

TOTAL 36 months( 3years)

RECOMMENDED MINIMUM TEXT BOOKS AND JOURNALS
BOOKS:
1 Cotran, Kumar, Collins. Robin’s Pathologic Basis of Disease, published by W.B. Saunders & Company.
5. Juan Rosai, Ackerman’s Surgical Pathology, published by C.V. Mosby Company.
25. Recent advances in Histopathology, Haematology, Blood coagulation etc.
27. Interpretation of Breast Biopsies - Carter
30. Epstein Prostate Biopsy Interpretation, published by Lippincott- Raven
34. Ioachim H.L, *Lymphnode Pathology*, published by Lippincott
35. Kilpatrick, Renner, *Diagnostic Musculoskeletal Surgical Pathology, Clinicoradiologic & cytologic correlations*, published by Saunders
36. Kurman R.J, Blaustein’s pathology of the female genital tract, published by Springer
38. MacSween, Butt, Portman et al, *Pathology of the liver- published by Churchill Livingstone*
44. Rosen P, Pathology of Breast, published by Lippincott Williams and Wilkins
46. Weedon, Skin Pathology, published by Churchill Livingstone
47. Wickremasinghe, Blood and Bone marrow pathology, published by Churchill Livingstone
49. Cibas E.S, Cytology: Diagnostic principles and clinical correlates, published by Saunders
50. Geiinger, Modern cytopathology
53. Miettinen M, Diagnostic soft tissue pathology, published by Churchill Livingstone
55. Collins R.D, Paediatric Haematopathology, published by Churchill Livingstone
59. WHO Classification of tumours, published by IARC Press.

JOURNALS:
3. Journal of Clinical Pathology, published by B.M.J.
5. American Journal of Surgical Pathology, published by Lippincott & Raven
6. Indian Journal of Pathology & Microbiology, published by IAPM.
8. Indian Journal of Cytology, published by IAC.
9. LANCET published by Elsevier
11. Histopathology, Journal of the British Division of the International Academy of Pathology-Published by Blackwell Science
13. Archives of Pathology and Laboratory Medicine-Published by American Medical Association
14. Human Pathology- Published by W.B. Saunders & Company.
15. American Journal of Clinical Pathology published by ASCP
16. Indian Journal of Cytology
17. WHO Bulletin published by WHO
18. Indian Journal of Urology
19. Modern Pathology
20. Indian journal of Leprosy published by Indian Leprosy Association

ADDITIONAL READINGS:
3. ICMR, Policy, Statement of ethical considerations involved in research on Human subjects, 1982 ICMR, New Delhi.
4. Code of Medical Ethics framed under Section- 33 of Indian Medical Council Act , 1956 . MCI, Kotla road, New Delhi.
5. Santosh Kumar, The elements of Research , writing and editing 1994, Dept. of Urology, JIPMER, Pondicherry
7. Francis C.M Medical Ethics, J.P.Publication, Banglore 1993
8. Indian National Science Academy, Guidelines for care and use of animals in scientific research, New Delhi, 1994
such log books will also allow a review of training programme and incorporation of improvements in the programme. Postgraduates are required to carry the log book and get the entries made regularly. Faculty is requested to countersign. Log books have to be submitted to the head of the department before submitting the final examination form.

**PERSONAL BIO-DATA**
Name of the Student:
Date of joining:
Probable date of appearing for Examination:
Date of Birth:
M.B.B.S from:
Year of passing MBBS:
Name of the State Medical Council:
Registration No with date:
Permanent Address:
PIN: Phone No.: ( )
Local Guardian’s Address:

CERTIFICATE

This is to certify that Dr…………………………………… has completed the tenure for M.D. satisfactorily.

P.G.Teacher Programme Incharge

P.G.Teaching Professor & Head

EVALUATION SYSTEM

A. DISSERTATION

a) Thesis / Dissertation is compulsory. Every candidate is required to carry out the work on a selected research project under the guidance of a recognized post graduate teacher. The results of such work shall be submitted in the form of a Dissertation.

b) The Dissertation is aimed at training the candidate in research methods and techniques. It includes identification of a problem, formulation of a hypothesis, search and review of relevant literature, getting acquaintance with recent advances, designing of research study, collection of data, critical analysis of results and drawing conclusions.

c) The title of the topic along with the plan of work not exceeding 500 words in prescribed proforma should be submitted to the University with the recommendation of guide through proper channel within a period of 3 months from the date of registration for the postgraduate course. There should not be an overlap of topic, cases, material or the related data among the candidates within the department during the period of actual Dissertation work. Prior approval by the local Ethical Committee is essential. Unless communicated otherwise within a period of 2 months from the date of receipt of plan of work by University, it shall be assumed that topic of Dissertation is approved and no communication is necessary in this regard. The last date for submission will not be extended without prior permission from the University. In case of delay in submission of topic of Dissertation and plan of work, the period of training of the candidate will be proportionately extended for which the entire responsibility shall be upon the candidate.

d) The volume of the Dissertation should be reasonable and may vary depending on the topic. The bibliography should be as per Vancouver system.

e) Four copies of the Dissertation complete in all respect certified by the guide should be submitted to the University through proper channel 6 months before the final examinations to the registrar. (evaluation)
f) The identity of the candidate/ teacher/ Department /College / Place should not be disclosed in the Dissertation. Acknowledgement should not be included in the Dissertation.

g) Certificates issued by guide, countersigned by Head of the Department and the Dean certifying, therein that the work done by the candidate has been carried out under the supervision of the guide to his/her entire satisfaction, should be submitted separately to the University.

h) Dissertation approval is a prerequisite for appearing at the University exam. In case the Dissertation, is not accepted, the same shall be communicated to the candidate along with reasons for rejection at least 2 months prior to the commencement of theory exam.

i) The candidate may make necessary corrections and resubmit the Dissertation at least 1 month prior to the commencement of theory exam.

B. LOG BOOK (Work diary)
The postgraduate students should include all their activities in the log book. The annual assessment based on the work diary shall be done by the guide, teacher in charge of postgraduate teaching programme and HOD.

C. COURSES
Course - I General Pathology (MDPA1)
CO1: Understand response of cells/tissue to various injurious agents
CO2: Understand the basis of differentiation between benign and malignant tumours
CO3: Identify different infectious organisms and their tissue reactions
CO4: Relevance of genetic basis of diseases
CO5: Understand causes and pathogenesis of disease

BASIC SCIENCES
Anatomy/histology of all structures in human body/organs
- Physiology and biochemistry- Basic aspects of various metabolism and functioning of endocrines
- Genetics-Fundamental / applied aspects
- Biostatistics
- Biomedical ethics- ethical issues related to Medical practice and research

Course - II Haematology, Clinical Pathology, Cytology and Transfusion Medicine (MDPA2)
CO1: Planning of tests, interpretation and diagnosis of haematological diseases
CO2: Knowledge of automation and quality assurance in Haematology
CO3: Possess the knowledge necessary for the evaluation and reporting of cytopathology specimens along with ability to independently perform fine needle aspiration of palpable superficial lumps in patients and make good quality smears
CO4: Have reasonable working knowledge of blood banking
CO5: Knowledge of principles of all clinical pathology tests and significance of altered values and interpretation
Planning of tests, interpretation and diagnosis of haematological diseases

Knowledge of automation and quality assurance in Haematology
Possess the knowledge necessary for the evaluation and reporting of cytopathology specimens along with ability to independently perform fine needle aspiration of palpable superficial lumps in patients and make good quality smears
Diagnosis based on peripheral smears
Have reasonable working knowledge of blood banking
Knowledge about transfusion reactions
Knowledge about frozen section and its staining techniques

Knowledge of principles of all clinical pathology tests and significance of altered values and interpretation

Course - III Systemic Pathology (MDPA3)
CO1: Be able to identify, and systematically and accurately describe the chief gross anatomic alterations in the surgically removed specimens and take appropriate tissue sections
CO2: Be able to correctly diagnose majority of the cases in routine reporting
CO3: Knowledge of tissue-processing and understanding of the principles of automatic tissue-processing machine
CO4: Be aware of the technique of autopsy and have sufficient understanding of various disease processes, so that a meaningful clinico-pathological correlation can be made

Be able to identify, and systematically and accurately describe the chief gross anatomic alterations in the surgically removed specimens and take appropriate tissue sections
Clinical correlation of the pathology findings and the symptoms of the patient in reaching the diagnosis of the patient
Different staining methods used
Be able to correctly diagnose majority of the cases in routine reporting
Knowledge of tissue-processing and understanding of the principles of automatic tissue-processing machine

Be aware of the technique of autopsy and have sufficient understanding of various disease processes, so that a meaningful clinico-pathological correlation can be made.

Course - IV Recent Advances in Pathology (MDPA4)
CO1: Familiarity with the principles, procedures and interpretation of various immunohistochemical stains
CO2: Familiarity with principles and techniques of electron microscopy and the working of an electron microscope
CO3: Familiarity with importance of statistical methods in assessing data from patient material and experimental studies
CO4: Understand the principles of molecular testing especially related to the disease processes and theranostic applications in various diseases
CO5: Knowledge on immunofluorescence techniques especially in kidney and skin biopsies

Familiarity with the principles, procedures and interpretation of various immunohistochemical stains
Familiarity with principles and techniques of electron microscopy and the working of an electron microscope
Familiarity with importance of statistical methods in assessing data from patient material and experimental studies
Understand the principles of molecular testing especially related to the disease processes and theranostic applications in various diseases
Knowledge on immunofluorescence techniques especially in kidney and skin biopsies

Course V Soft Skills (MDPA5) - Elective Course
CO1: Ability to design and implement a research project.
CO2: Competency to interact with/counsel patients and relatives in a proper manner.
CO3: Fostering proper work culture.
CO4: Ability work as a part of a team.
CO5: Knowledge of principles of biomedical ethics.

D. UNIVERSITY EXAMINATION
The university examination will comprise of theory and practical. To be eligible to be declared as successful in the PG Degree examination it is compulsory for the candidate to pass in theory and practical examination separately in the same attempt.

a) Theory examination:

There shall be four question papers, each of three hours duration. Each paper will be of 100 marks. Minimum passing percentage is 50%

Paper I- General Pathology
Paper II- Haematology, Clinical pathology, Cytology & Transfusion Medicine, .
Paper III- Systemic Pathology
Paper IV- Recent Advances in Pathology

Each paper will consist of
2 LAQs of 20 marks each - 40
6 SAQs of 10 marks each – 60

**Total 100 marks**

*Marking Pattern for Theory Examination*

Marks for individual Paper question

<table>
<thead>
<tr>
<th>Question</th>
<th>Type</th>
<th>Marks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q1</td>

<td>20 marks</td>
</tr>
<tr>
<td>Q2</td>
<td>LAQ2</td>
<td>20 marks</td>
</tr>
<tr>
<td>Q3 - Q8</td>
<td>6 SN</td>
<td>10 marks each</td>
</tr>
</tbody>
</table>

Minimum passing marks 200
Total Marks 400
The candidate should score minimum 200 out of total 400 marks in theory i.e 50%

b) Practical Examination  Duration – 3 days

**DAY 1:**

i) Clinical case will include **Total 75 marks**
- urine examination - **20**
- haemogram - **20**
- special haematology test-1 – **20**
- case discussion – **15**

ii) Reconstructed autopsy - **20 marks**

iii) Gross/ Morbid Anatomy - **30 marks**

iv) Haematology and Cytology 15 slides - **75 marks**
(8 & 7 slides respectively, five minutes duration for each slide.)

**DAY 2:**

i) Histopathology slides- 25 slides- **125 marks**
   (the candidate should be assessed so as to evaluate performance in identifying common as well as rare lesions).Five minutes duration for each slide.

ii) Histopathological Techniques  **20 marks**
   1) Block cutting
   2) Staining- H & E & Pap
   3) Special stain- 1

**DAY 3**

i) Teaching : **15 marks**

ii) Viva Voce :- **40 marks**

Student will be examined by all the examiners together, about students’ subject knowledge, comprehension, analytical approach, expression and interpretation of data, and will include discussion related to dissertation.

**Marking scheme for practical examination**

MODEL QUESTION PAPERS

Amrita Institute of Medical Sciences, Kochi
MD PATHOLOGY

Time 3 hours Max. Marks: 100

PAPER I GENERAL PATHOLOGY

Your answers should be specific to the questions asked. Draw neat labeled diagrams wherever necessary. Answer all questions.

LONG ESSAY 2X20= 40 Marks

1. Discuss the role of endothelium in health and disease.

2. Discuss the molecular basis of carcinogenesis.

SHORT ESSAY 6x10=60 marks

3. Role of oxygen free radicals in disease
4. Etiopathogenesis of amyloidosis
5. Pathogenesis of pathological calcification
6. Mechanism of immunological tolerance
7. Pathogenesis of disorders caused by smoking
8. Hypercoagulability

* * * * * * * * * * *

Amrita Institute of Medical Sciences, Kochi

MD PATHOLOGY

Time 3 hours Max Marks: 100

PAPER II HAEMATOLOGY, CLINICAL PATHOLOGY, CYTOLOGY AND TRANSFUSION MEDICINE

Your answers should be specific to the questions asked.
Draw neat labeled diagrams wherever necessary.
Answer all questions.

LONG ESSAY  2X20=40 Marks

1. Discuss the role of bone marrow biopsy in the diagnosis of haematological disorders.

2. Discuss the role of FNAC in soft tissue tumours.

SHORT ESSAY  6X10=60 Marks
3. Diagnosis of primary and secondary lymphomatous effusions
4. Utility of cytospin in clinical laboratory
5. Molecular pathogenesis & morphology of myeloproliferative disorders
6. Thin prep cytology
7. Role of urinary sediment examination.
8. Blood Transfusion Reactions

* * * * * * * * * *

Amrita Institute of Medical Sciences, Kochi
MD PATHOLOGY
Time: 3 hours
Max.Marks: 100 Marks

PAPER III SYSTEMIC PATHOLOGY
Your answers should be specific to the questions asked.
Draw neat labelled diagrams, wherever necessary
Answer all questions

LONG ESSAY
2X20=40 Marks

1. Discuss the pathogenesis and pathology of Crohn's disease.
2. Discuss the differential diagnosis of granulomatous lesions in the liver.

SHORT ESSAY
6X10=60 Marks

3. Nephroblastoma
4. Endometrial carcinoma
5. Inflammatory myofibroblastic tumor
6. Male infertility diagnosis

7. Primary pulmonary hypertension.

8. WHO Classification of NHL with a brief note on ALCL

Amrita Institute of Medical Sciences, Kochi
MD PATHOLOGY

Time: Three Hours
Max: 100 Marks

PAPER IV RECENT ADVANCES IN PATHOLOGY
Your answers should be specific to the questions asked.
Draw neat labeled diagrams wherever necessary.
Answer all questions.

LONG ESSAY
2X20=40Marks

1. Discuss the Recent advances in the histopathology and molecular pathology of carcinoma of the endometrium

2. Discuss the molecular diagnosis of small round blue tumours of childhood

SHORT ESSAY
6X10=60 Marks

3. Methods of detection of Apoptosis in tissues

5. Papillary Carcinoma Thyroid, variants
6. Extra renal Rhabdoid tumour

7. Prognostic factors in Breast Carcinoma
